

## Migrate 4 AODOCS

A dedicated cloud migration platform that streamlines the migration process From SharePoint, Lotus, File Servers, and Legacy ECM solutions into AODOCS and Google Drive

### Migration is a critical step in the move to the cloud

Organizations are pressed to not only find feature parity with their new day-forward platforms, but must also maintain critical file and data integrity as a part of the migration process. AODOCS utilizes a three step process to ensure your migration success.

#### 1. Connect & Assess

Connect to multiple source environments and assess structures prior to migration. Migrate multiple libraries in a single migration with metadata mapping and edit capabilities.

#### 2. Migrate

Manage multiple migrations in parallel via dedicated admin dashboards. Migrate files, metadata, version history, and permissions in one streamlined process without sacrificing performance..

#### 3. Modernize

Once in AODOCS, leverage a powerful cloud-native Content Services Platform tightly integrated with G Suite and Google Drive.

AODOCS migrations can migrate source data and files from Google Sheets, Google Drive, Google Cloud Storage, and SharePoint online - 100% in the cloud. For sources like SharePoint On-Premise, Lotus Notes, and File Servers our gateway solution connects on-premise systems with our cloud services, meaning that the majority of the process still occurs in the cloud.

Migrate for AODOCS allows for domain level migration administration, metadata enrichment options after extraction from the source, ability to create document class and metadata automatically during the migration process into the AODOCS repository.

#### Efficient Cloud Migration

#### Full Feature Support

#### Built for Google Drive

#### Key Features

Organizations can have full confidence in moving their files and data with the AODOCS migration tool while gaining significant benefits of consolidation, modernization, and increased adoption.

- Migration of cloud and on-premise solutions
- Up to 200k files per day
- SharePoint, Lotus, File Servers, and Legacy ECM

- File & metadata
- File & data integrity maintained
- Versioning support
- Granular and advanced permissions supported

- Single Sign On (SSO)
- Google Drive Storage
- Google User Experience
- Office Files Collaboration

## AODOCS for Legacy Modernization

All you need to deliver efficient digital transformation

[Learn More](#)

AODOCS is the only document management and business process platform fully integrated with G Suite, allowing organizations in all industries to easily control their documents, scale their business-critical processes, and meet compliance requirements — all while enhancing user experience.

Replacing legacy ECM platforms with a cloud-based, collaborative platform, AODOCS dramatically reduces the time and money spent maintaining IT systems. AODOCS' patented business process platform is used by Google and recommended for G Suite.
