

Not your average credit monitoring

Identity theft can happen in seconds, yet traditional credit monitoring services can take days to alert you of questionable activity.

At Allstate Identity Protection, our goal is to alert members to exposed information before it can be used fraudulently. We provide advanced monitoring and near real-time alerts — so members can maximize their protection and minimize their need for recovery.

Benefits of Allstate Identity Protection

Auto-on monitoring

Unlike traditional identity protection services, we start working as soon as we receive a member's Social Security number.

Pre-existing condition resolution

Are you currently experiencing an identity theft issue? We will provide full remediation services with no additional fees.

Rapid alerting

Allstate Identity Protection is proud to provide alerts in near real-time, helping members quickly identify and resolve identity theft.

Access to credit report and score(s)*

Allstate Identity Protection provides credit reports and credit scores from TransUnion — the only credit bureau who hasn't suffered a breach.

Committed to privacy

Unlike free credit monitoring services, we don't sell your personal data or use it to serve up third-party ads.

Highly trained and certified privacy experts available 24/7

Our U.S.-based privacy experts are trained and certified to handle and remediate every type of identity fraud case.
