Staffomatic plug-in

Personnel planning made quick & easy: Enter all important events, weekly schedules, absences and open tasks directly in COYO and manage them.

Functionality

The Staffomatic plug-in allows you to view all important information related to staff planning, both at manager and employee level, directly in COYO. Tasks and adjustments can be completed directly via the plug-in.

Use Case

The Staffomatic plug-in gives a quick overview of occupancy levels for upcoming weekly schedules across all locations. In addition, absences, special days or employee birthdays are clearly displayed for the next seven days. Open tasks, such as unconfirmed absences or unread messages, can be handled directly along with swift adjustments to the weekly schedule.

Availability & price

The Staffomatic plug-in is available for the COYO Cloud and the COYO Private Cloud from V37 and is priced according to the license model starting at €1,000 per year.
