

REFLEX™ REVERSE OSMOSIS

WELCOME TO 21ST CENTURY REVERSE OSMOSIS

Desalitech produces the most advanced water purification system on the market. We save our clients more water with less cost and operational challenges than anyone else.

SAFEGUARD

Avoid the downfalls of traditional reverse osmosis and thrive where others fail. Desalitech's patented CCRO process provides unprecedented performance and is trusted by Fortune 500 companies for their critical water purification and reuse needs.

STREAMLINE

Simplify your water treatment operations with unmatched flexibility and robustness. Desalitech systems are easy to operate and automatically adapt to a wide range of changing water conditions, requiring less maintenance and oversight.

SAVE

Reap the rewards of unparalleled efficiency with a predictable and rapid Return On Investment (ROI). Desalitech guarantees maximum water recovery, reduces waste and energy use, and provides service and maintenance cost savings.

REFLEX™ REVERSE OSMOSIS

Desalitech's ReFlex Reverse Osmosis systems are rapidly replacing traditional water purification methods.

Desalitech clients around the globe rely on the consistent performance and ease of operation of their ReFlex solutions, saving significant costs through reduced maintenance, maximum water recovery rates and lower energy consumption. Desalitech offers ReFlex models meeting the requirements of most industrial applications.

Desalitech offers ReFlex Max systems, designed for Zero Liquid Discharge (ZLD) and sea water applications.

BENEFITS

Flexibility: ReFlex systems automatically adapt to changing feedwater and allow the operator to modify recovery, cross flow, and flux in real time.

Reliability: ReFlex systems naturally mitigate the fouling and scaling that typically plagues reverse osmosis systems. Automated operation with online monitoring provides additional protection.

Maximum Recovery: ReFlex systems come with an industry-leading maximum recovery guarantee, operating at up to 98% recovery and allowing you to achieve your sustainability goals.

Energy Savings: ReFlex systems apply the optimal pressure to keep constant permeate flow, reducing average energy consumption by up to 35%.

Return On Investment: ReFlex systems minimize the largest cost associated with reverse osmosis system operation, wastewater disposal, which can be reduced by 50% to 75% and provide paybacks of under a year.

REFLEX™ SMART

ReFlex Smart gives facility operators peace of mind, 24 hours a day, 7 days a week. It is an integrated online monitoring, analysis and control platform that maximizes your ReFlex Reverse Osmosis system's performance and reliability. Many of today's Fortune 500 companies are relying on ReFlex Smart to provide real-time control and visibility of their water purification systems.

Choosing ReFlex Smart provides new ways of interacting with and controlling your Reflex Reverse Osmosis system, and the comfort of knowing it can take care of itself and alert you when needed. Combined with performance trend analysis, issues are proactively identified well before they can develop. With ReFlex Smart you can focus on your business, knowing that your water treatment is being handled – intelligently.

CLIENT EXAMPLES

PRIMARY APPLICATIONS

Pure Water Supply

Boiler Feed Water

Cooling Tower Makeup

Ingredient Water

Process Water

Desalination

Water Reuse

Coca-Cola

“As a consumer of water, Coca-Cola has a special responsibility to protect this shared resource. Our Desalitech reverse osmosis system helps us achieve our goal.”

Selim Mizrahi
Director of Engineering Services

ABOUT US

Water scarcity is now a global problem. Growing water demand and excessive consumption of water is increasing with population and technology adoption. World experts advise that these water challenges will only get worse without improved water efficiency, reuse, and desalination.

Desalitech's ReFlex™ Reverse Osmosis systems are innovative solutions that forward-thinking users employ to address their water challenges. They are rapidly replacing traditional water purification methods due to their high reliability, efficiency, and economic value proposition.

Desalitech's industrial and municipal clients around the globe rely on ReFlex systems for their critical water needs and are guaranteed maximized water recovery rates of up to 98%, reduced energy consumption of up to 35%, and maintenance cost reductions of up to 20%.

Desalitech is headquartered in Newton, Massachusetts, USA and was the proud recipient of the 2016 Breakthrough Water Technology Company of the Year award from Global Water Intelligence.
