Synapse® Enterprise Imaging Makes a Big Impact for Little Patients at Arkansas Children's Hospital

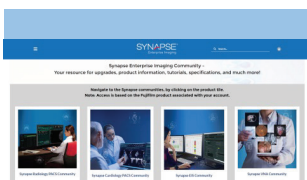

Nationally ranked Arkansas Children's Hospital knew it needed more than just a PACS replacement to continue delivering the high-quality pediatric care it was known for. It needed a progressive partner who could provide a server-side, zero-footprint technology, along with a reliable VNA and enterprise viewer to support unrestricted image access across the enterprise. It found that partner in Fujifilm.

Learn How One Solution Brings Unlimited Enterprise Imaging Possibilities to Today's Healthcare Facilities

Fujifilm's newest interactive eBrochure illustrates how the company's server-side technology converges the functionalities of Synapse Radiology PACS, Cardiology PACS, VNA, 3D, and Fujifilm's AI-supported platform REILI® on one common viewer, helping to make true enterprise imaging possible for today's care facilities.
