

Fujifilm Systems Integration: Trusted Technology Partners

Through the partnership of three leading healthcare technology companies – Fujifilm, caresyntax, and Diversified – Fujifilm offers value-added technology beyond current standards. Our combined software and hardware integrations and services create a differentiated solution, helping healthcare providers deliver optimal patient care.

Fujifilm launched its healthcare business with x-ray film in 1936, and for almost 85 years now we have continued to pursue technological innovation to help healthcare organizations like yours make the world a healthier place. As the industry advances, Fujifilm will continue to adapt and explore new ways to apply advanced technologies to solve our most pressing healthcare challenges.

Caresyntax solutions and services enable surgical teams to reduce patient, provider, and organizational risk using actionable clinical data, made available through a combination of data collection and data analytics technologies.

Trusted in over 8,000 operating rooms worldwide, caresyntax helps surgeons, their surgical teams and healthcare executives to improve patient safety, care quality, and manage risk, resulting in improved outcomes in over 10 million procedures per year.

Diversified is enabling a digital future — connecting people, technology and experiences, where and when it matters most. Nowhere is this connection more vital than in today’s healthcare environments. Digital screens and the content they share are the modern interface of today’s communications. Whether it’s delivering real-time information to a surgical team, updating an anxious family in the waiting area, or helping guide a patient to a critical consultation, Diversified’s solutions are experienced every day throughout leading global healthcare organizations. Our dedicated team of medical innovation professionals understand the unique challenges of reducing costs while helping healthcare facilities improve patient care. We partner with your organization to deliver solutions that integrate seamlessly into your existing infrastructure and assets—solutions that improve workflows and stakeholder awareness, all while achieving the ultimate goal of an enhanced patient and family experience.
