

flexmls Tip!

New Improvements to Quick Launch in flexmls

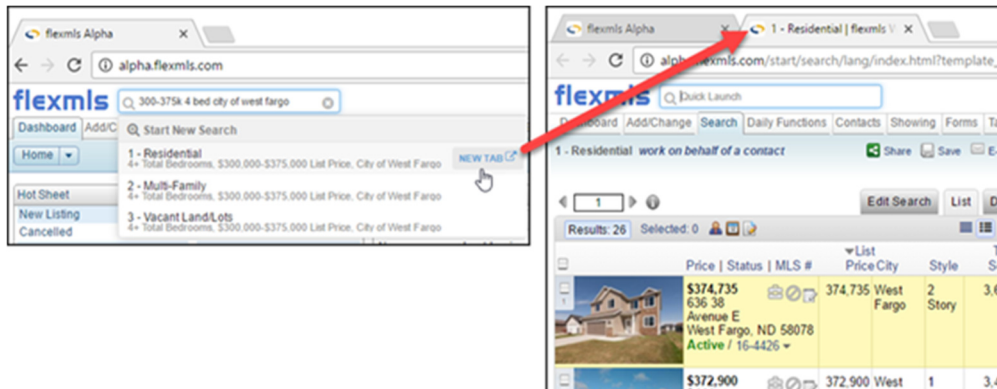

Created January 2017

Now, it's easier than ever to multi-task in the flexmls system when you open information on separate tabs within your browser. **Quick Launch**'s new icon enables you to open items quickly in a new tab for easy viewing.

Here's how you can take advantage of this new functionality:

You can use **Quick Launch** to search for an agent or office, a property by MLS number, a Contact, or a Listing Collection. Simply click the **New Tab** icon and the result will open in a new tab within your browser. You can use **Quick Launch** to open as many tabs in flexmls as you need.

Important! Users of Touch Screen Devices

If you use the full flexmls website on a touch screen device, you do not need to hover over a result to access the **New Tab** option. Instead, the **New Tab** option will automatically display for all results in the **Quick Launch** bar.
