

mls Tip!

Using FloPlan is Easy!

Created September 2020

If you've put off downloading the FloPlan app until you have more time, don't wait another minute—it's much easier than you may think!

Here's how to use FloPlan in 5 simple steps:

- 1.** Download the FloPlan app on your smartphone and log in.
(use the same username and password as your flexmls login)
- 2.** Select the **+** in the app to begin.
- 3.** Record your walk through the property.
- 4.** Select **done**, enter the property address and process the scan.
- 5.** Once the floorplan has been reviewed for accuracy, you can link it to your MLS listing.

That's all there is to it! When you use FloPlan, you'll “wow” your clients with the latest technology to promote their property and you'll give potential buyers a virtual look at what your listing has to offer.

Stay up-to-date. [Find a weekly Webinar on FloPlan here.](#) This webinar will be a quick 15 minutes or less.
