

**"AUTOMATION SYSTEMS THAT WORK"**

# COMPREHENSIVE PROCESS AUTOMATION...QUALITY PRODUCTS BY DESIGN

## THE SECRET IS SERVICE

At TLC, *service* is far more than a catchword: It is prompt resolution of customer needs and fast job turnaround – regardless of order size. It is skilled personnel, engineering expertise, PLC know-how and rigorous quality standards. Most importantly, it is a shared employee dedication to producing highly dependable products at competitive prices.

It seems to be working...

Since 1979, we've enjoyed sustained growth and boast one of the industry's highest repeat business rates.

## COMPREHENSIVE CONVENIENCE

Comprehensive TLC services include reading and interpreting specs; furnishing quotations, drawings and schematics; and offering critical design guidance...along with complete system fabrication, testing, final inspection, delivery and start-up assistance.

## WHY TLC?

We understand control systems and automation. Nearly two decades of meeting customer needs in a highly competitive industry reflects our ability to deliver prompt, attentive services, proven design expertise and utterly dependable products.

### ■ Fast Response.

Computer-aided for speed and accuracy, TLC quotes are typically returned within hours; finished drawings within days – not weeks. In

addition, we maintain a CAD library of over 5,000 current drawings and a large component inventory.

### ■ Total control expertise.

With technicians averaging over 12 years of hands-on automation systems expertise, we're able to tackle your most demanding needs with economical, all-inclusive solutions.

### ■ Engineered durability.

TLC products and systems are designed for years of trouble-free operation. Industrial grade standardized components and reinforced construction ensure year-in, year-out system durability.

### ■ Quality standards.

UL 508 procedures and strict NEC/UL conformance, experienced technicians and "field condition" testing are your best guarantees of uniform high quality and dependable end-use performance.

### ■ PLC capability.

User-friendly custom PLC programming may be included with any system, or we can modify your existing system for enhanced performance.

### ■ Fast turnaround.

Flexible scheduling, computer-aided design and streamlined assembly speed production. Choose from a variety of on-time delivery programs for optimum convenience and cost savings.

### ■ Competitive pricing.

Skilled component sourcing and sheer production expertise permit *extremely* competitive pricing.

### ■ Start-up assistance.

Expert installation guidance ensures smooth start-ups and timely project completions.

Filter Controller

Finally, we go to extraordinary lengths to make certain that your control product or system works precisely as intended...the first time – guaranteed!

## YOUR BEST CHOICE

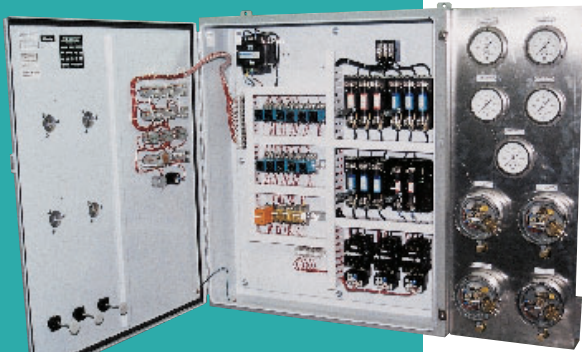

For bottom-line control systems and automation performance – backed by the industry's most rigorous quality standards – there's only one choice.

Call today. See for yourself why, since 1979, people with demanding process needs have looked to the professionals at TLC Controls Inc. for unequaled service and rugged control system dependability.

**T**LC offers broad single-source custom design and fabrication services for industrial, waste water and water process automation.

- **Products** include constant or variable speed control panels, PLC controllers, VFD drives, panels, consoles, motor control centers, SCADAs, and assorted enclosures for lift pump; booster, aeration, grit removal, dewatering or irrigation system; filter, elevated tank or chemical pump operation.

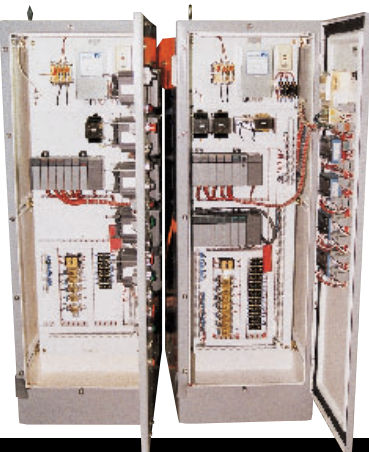

- **Applications** include single or multi-pump installations for municipal water systems, industrial plants, malls, commercial buildings, housing tracts and HVAC systems...or virtually any application requiring lasting, trouble-free control performance.

Constant Speed Pressure Booster

Medium-Voltage Deep-Well Pump Control

PLC-Based Chemical Feeder System

Variable Frequency Pressure Boosters

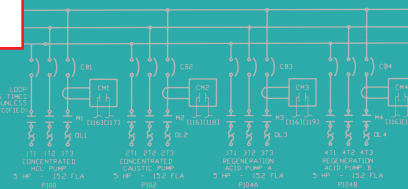

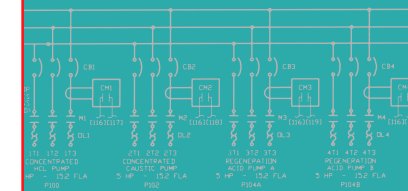

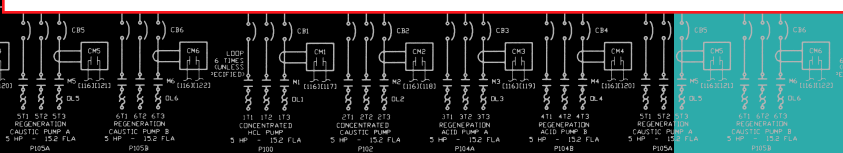

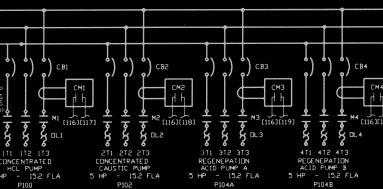

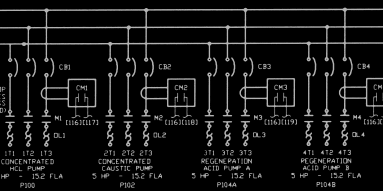

Motor Control Center

*Packaged Lift Station Control*

## **TLC Controls, Inc. — A Wealth of Process Control Dependability**

- Process Systems
- Variable Frequency Drives
- Bubbler Systems
- Graphic Annunciators
- Constant Pressure Systems
- Explosion Proof Panels
- Variable Frequency Drives
- PLC Controllers
- Operator Consoles
- Touch Screen Controls
- Motor Control Centers
- Supervisory Control (SCADA) Systems
- UL Listed
