NOTE:

1. When ordering, specify Model number for pump and pair with 10-digit motor part number
 2. Default elastomers is EPDM when not specified on the order
 - 2a. Add Viton to description to change elastomers when ordering
- *All cast iron bases come flanged and NPT threaded

NOTE:

- Tri-Voltage motors are useable at 208v; Not Premium Efficient at 208v but allowed for use; for suitability below this voltage level RTF
 - When ordering, specify Model number for pump and pair with 10-digit motor part number
 - Default elastomers is EPDM when not specified on the order
 - 3a. Add Viton to description to change elastomers when ordering
- *All cast iron bases come flanged and NPT threaded
- .5HP and .75HP are not Prem Efficient. These are exempt from the Integral HP rule and are not required to be Premium Efficient

NOTE:

- Tri-Voltage motors are useable at 208v; Not Premium Efficient at 208v but allowed for use; for suitability below this voltage level RTF
- When ordering, specify Model number for pump and pair with 10-digit motor part number
- Default elastomers is EPDM when not specified on the order
 - Add Viton to description to change elastomers when ordering
- *All cast iron bases come flanged and NPT threaded
- .5HP and .75HP are not Prem Efficient. These are exempt from the DOE Integral HP rule and are not required to be Premium Efficient

PVM1-Series

Connection: Grooved

NOTE:
 1. When ordering, specify Model number for pump and pair with 10-digit motor part number
 2. Default elastomers is EPDM when not specified on the order
 2a. Add Viton to description to change elastomers when ordering
 *All cast iron bases come flanged and NPT threaded

PVM3-Series

Connection: Flange
Motor: 3 Ph/60Hz
Speed: 3500 RPM
Encl: TEFC

NOTE:

1. Tri-Voltage motors are useable at 208v; Not Premium Efficient at 208v but allowed for use; for suitability below this voltage level RTF
2. When ordering, specify Model number for pump and pair with 10-digit motor part number
3. Default elastomers is EPDM when not specified on the order
- 3a. Add Viton to description to change elastomers when ordering
- *All cast iron bases come flanged and NPT threaded
4. .5HP and .75HP are not Prem Efficient. These are exempt from the DOE Integral HP rule and are not required to be Premium Efficient

NOTE:

1. Tri-Voltage motors are useable at 208v; Not Premium Efficient at 208v but allowed for use; for suitability below this voltage level RTF
2. When ordering, specify Model number for pump and pair with 10-digit motor part number
3. Default elastomers is EPDM when not specified on the order
 - 3a. Add Viton to description to change elastomers when ordering
- *All cast iron bases come flanged and NPT threaded
4. .5HP and .75HP are not Prem Efficient. These are exempt from the DOE Integral HP rule and are not required to be Premium Efficient

PVM3-Series

Connection: Grooved
Motor: 3 Ph/60Hz
Speed: 3500 RPM
Encl: TEFC

NOTE:

1. Tri-Voltage motors are useable at 208v; Not Premium Efficient at 208v but allowed for use; for suitability below this voltage level RTF
2. When ordering, specify Model number for pump and pair with 10-digit motor part number
3. Default elastomers is EPDM when not specified on the order
 - 3a. Add Viton to description to change elastomers when ordering
- *All cast iron bases come flanged and NPT threaded
4. .5HP and .75HP are not Prem Efficient. These are exempt from the DOE Integral HP rule and are not required to be Premium Efficient

PVM5-Series

NOTE:

1. Tri-Voltage motors are useable at 208v; Not Premium Efficient at 208v but allowed for use; for suitability below this voltage level RTF
2. When ordering, specify Model number for pump and pair with 10-digit motor part number
3. Default elastomers is EPDM when not specified on the order
- 3a. Add Viton to description to change elastomers when ordering
- *All cast iron bases come flanged and NPT threaded
4. .5HP and .75HP are not Prem Efficient. These are exempt from the DOE Integral HP rule and are not required to be Premium Efficient

PVM10-Series

NOTE:

1. Tri-Voltage motors are useable at 208v; Not Premium Efficient at 208v but allowed for use; for suitability below this voltage level RTF
2. When ordering, specify Model number for pump and pair with 10-digit motor part number
3. Default elastomers is EPDM when not specified on the order

3a. Add Viton to description to change elastomers when ordering

*All cast iron bases come flanged and NPT threaded

PVM15-Series

Connection: Flange
Motor: 3 Ph/60Hz
Speed: 3500 RPM
Encl: TEFC

NOTE:

1. Tri-Voltage motors are useable at 208v; Not Premium Efficient at 208v but allowed for use; for suitability below this voltage level RTF
2. When ordering, specify Model number for pump and pair with 10-digit motor part number
3. Default elastomers is EPDM when not specified on the order
- 3a. Add Viton to description to change elastomers when ordering
