

Managed Security Services

powered by ActiveEye technology

Business is increasingly being conducted on mobile devices and cloud services, making it difficult for traditional IT and security teams to keep up. With the frequency and severity of attacks increasing, organizations need the people, technology, and proven methods to swiftly recognize and respond to threats.

Crypsis bridges your security gaps through continuous monitoring of network, endpoint, and cloud activity, backed with 24x7 support from our security operation center (SOC) experts. Our managed security service, powered by ActiveEyeSM, prevents small security events from evolving into bigger incidents, and reduces the time required to detect, contain, and eradicate threats. With years of experience in real-world incident detection and response, we focus on your security so you can focus on your business.

From network traffic monitoring and control to compliance reporting and tracking, we serve as the extension to your security team through our comprehensive managed services approach.

Bridge the gap to 24x7 detection and response

In-depth protection

Get comprehensive data protection and 24x7 cyber security coverage. The ActiveEye team continuously monitors your systems and data to detect and respond to threats.

Improved visibility

View network, endpoint, and cloud activity in one place to get full visibility into all your environments.

Expert assistance

Our dedicated team of US-based analysts and consultants provide actionable recommendations to prevent incidents, minimize damage, and implement best practices.

Detection & Response

Detect and prioritize threats across cloud and on-premise infrastructure

Security Governance

Detect misconfigurations or policy violations that create risk

Reporting

Prove compliance with NIST CSF benchmarks and other frameworks

Endpoint

Protect your endpoints with threat detection, asset discovery, internal traffic analysis, and log collection.

SaaS applications

Whether it's Office 365, G Suite, or Salesforce, ActiveEyeSM protects assets as you move to the cloud.

Cloud infrastructure

Gain visibility into your cloud infrastructure to stay productive and secure. We monitor configuration settings and network anomalies to keep your cloud safe.

Enterprise network

Meet compliance requirements and detect threats with NIDS, monitoring, log retention, reports, and vulnerability assessment.

Threat analytics

ActiveEye learns who and what is attacking your organization, building a threat database that analysts can add to manually as well. Advanced machine learning uses this data while profiling users to detect account takeover or insider threats.

Alert prioritization and SOC metrics

Leverage expertise across the team, enabling collaboration and documenting it for future reference.

- ActiveEye rank orders alerts so analysts are focused on the highest risks.
- ActiveEye captures key metrics around work loads, ability to meet service levels, and response actions taken.

Features

- ✓ 24x7 Monitoring and Alerting
- ✓ Customizable Content Filtering
- ✓ Online Portal to View and Manage Alerts
- ✓ Archival Event-logging from Multiple Devices
- ✓ Cloud Application and Infrastructure Monitoring
- ✓ Endpoint Monitoring
- ✓ Compliance Reporting
- ✓ Anomaly Detection and Reporting
