		Walker Mower Specifications	Back Cover

A man in a dark shirt and cap is riding a yellow and white Walker riding mower on a large, well-maintained green lawn. A large, leafy tree stands to the right of the mower, casting a shadow over part of the grass. In the background, there are more trees and a paved road.

Since my dad, brother, and I designed the first Walker Mower in 1977, it has always been intentionally different from other lawn mowers. At the time, my family was frustrated with the challenges we were having with mowing our own lawns quickly, easily, and with satisfying results. There was simply no riding mower available that could mow the way we wanted, so we designed and built our own. If you can't buy it, build it, and so we did.

Over the years we have continued to improve the design of the Walker Mower, with each change improving the Walker's agility, ease of use, and cut quality. Our family has set a high standard of performance, and every aspect of the Walker Mower is created with that standard in mind.

Today Walker Mowers are American-made and hand-built with pride in Fort Collins, Colorado. When you buy a Walker, you are not only buying a high-quality product, you are joining the Walker Mower family.

Bob Walker

Bob Walker, Chairman
Walker Manufacturing

"We bought Walkers because they are just more productive than the mid-mounts we were using." Adam Marrale (right)

"And the beautiful results we are getting on each property are just a bonus for investing in Walkers." Paul Ballenger (left)

Adam Marrale and Paul Ballenger
Natural Creations, Nashville, Tennessee

Customer Profile: ***Natural Creations***

Time is money for the team at Natural Creations in Nashville, Tennessee, and that was exactly their guiding principle as they looked to improve their mowing efficiency a few years ago. “We were looking to grow bottom line profit through efficiency gains rather than volume growth,” explains Adam Marrale, “and we believed running Walkers could do that for us.”

Marrale and his co-worker, Paul Ballenger, put their plan into action by introducing Walker Models B and H into a single crew, and the hours saved in productivity that year equaled \$25,000 in labor hours. According to Marrale and Ballenger, the hours they freed up also allowed them to add more value to their high-end properties and add on additional revenue generating work. After a single year of research, they now have the basis for putting Walker Mowers on each of their six crews.

Ballenger also mentions one other benefit of switching to Walker Mowers, “The beautiful results we are getting on each property are just a bonus for investing in Walkers—we made the right choice.”

Front-Mount Deck

Achieving a beautiful cut has been our focus from the very first Walker Mower design. Positioning the mowing deck in front of the machine is fundamental to producing high-quality results. The front-mount deck of the Walker reduces impact on the turf prior to cutting, resulting in a more consistent, carpet-like finish. This result is achieved by transferring weight from the deck caster tires which minimizes matting of the grass.

The Walker torsion-flex carrier frame allows the deck to freely articulate and flex laterally, producing a smooth cut, even over complicated ground contours. This makes Walker Mowers ideal for mowing uneven turf.

Short Deck Coupling

Front-mount decks also create a shorter distance between the contact point of the drive tire and the contact point of the front caster tire, allowing Walker decks to precisely follow ground contours. Compared to mid-mount hanging decks, Walker mowing decks scalp less and leave less uncut grass in the valleys of ground contours.

SCALP LESS GRASS ON THE CREST

CUT MORE GRASS IN THE VALLEY

Interchangeable Decks and Add-ons

Whether handling grass, leaves, debris, or snow, Walker Mowers are designed for year-round productivity. On most models, decks can easily be switched for larger or smaller, collection, mulching, or discharge decks to suit the task at hand. Plus with dozens of add-ons, such as a dethatcher, dozer blades, snowblowers, and enclosed cabs, the Walker is one of the most versatile mowers on the market.

Tilt-Open Bodies and Tilt-Up Decks

Each Walker features a tilt-open body, quickly exposing the drive belts, electrical system, engine, and drivetrain, making service and maintenance easy. No special tools or equipment are needed. Simply release the body latch, and the gas spring assisted enclosure opens up for unobstructed access to all of the Walker's working components.

All Walker decks quickly tilt-up, making maintenance tasks safe and easy. It takes seconds to unlock, lift, and secure the deck in an up position, providing access to the blades, housing, and chute. H models also have an optional Power Tilt-Up® deck lift. Walker tilt-up decks also minimize wasted space when storing the Walker Mower.

Compact

Most lawns have areas with low hanging branches, narrow gates, or other obstacles that are difficult to mow. The compact size of the Walker Mower gives you the ability to mow challenging properties easily and efficiently.

The Walker Mower has a small footprint designed to get into and out of tight places like gates, between beds and trees, fence corners, and other similar landscape features.

Walker T27i with 52" deck footprint: 53" (134.62 cm) W 95" (241.30 cm) L
versus a Z Master with 52" deck: 68" (172.72 cm) W 102" (259.08 cm) L

Precision Steering and Handling

With an operator-friendly combination of finger-tip steering and the Forward Speed Control, the Walker Mower goes precisely where you want it to with little effort.

FORWARD SPEED CONTROL

Once in the drive position, the Forward Speed Control uses a friction lock to work as a cruise control, allowing you to control the mower by simply applying pulling pressure on the steering levers. To stop, pull the Forward Speed Control back to the Neutral-Park position.

STEERING LEVERS

Walker Mower steering levers take control the moment pressure is applied. Each steering lever is spring-dampened, providing smooth machine operation. You can easily steer the machine by controlling both levers with a single hand, only using gentle fingertip pressure. The steering system is designed for precision steering and handling, using optimal linkage geometry and high-quality components.

Grass Handling System® (GHS)

Walker invented the internal Grass Handling System® on its first mower, and it remains the most efficient way to vacuum grass clippings, leaves, and debris from the lawn.

Collection decks move clippings to a center, rear discharge chute where an internal blower vacuums grass clippings and debris, and then blows it directly into a compact, rear-mounted grass catcher box. The PowerFil® oscillating chute evenly packs clippings, and the Grass-Pak® full signal alerts the operator when it is time to empty the catcher. To dump clippings, the operator simply lifts the catcher with the side handles, or utilizes the optional Power Dump or Hi-Dump® add-ons from the operator seat.

Pictured: S14i with optional Power Dump

Integrated Components

Walker Mowers are engineered to ensure the entire grass collection system is internal. This intentional effort has allowed Walker Mowers to retain their compact footprint. There are no bulky tubes or bags extending beyond the footprint of the mower. By positioning the GHS blower internally, a powerful vacuum action is achieved, leaving a carpet-like appearance to your lawn in spring, summer, and fall.

Internal GHS 12.75"
(32.38 cm) Blower
(Model S)

Internal GHS 10.5"
(26.67 cm) Blower
(Models C, T, D)

"I tried a variety of mowers, but none stripe like my Walker. I never had striping on my lawn until I put a Walker on it "

Bill Caudill

Home owner, Vancouver, Washington

Customer Profile: ***Bill Caudill***

Bill Caudill of Vancouver, Washington, has a quiet retreat for a back yard. This beautiful slice of heaven was landscaped 12 years ago by a friend of the family to prepare for Bill and his wife, Sandy, to host the wedding and reception of one of their twin daughters. Lowering the growing surface and repurposing the dirt as a barrier at the back of the yard were the primary jobs and were done masterfully to create an elegantly tiered yard that includes luxurious plantings and a beautiful stand of Kentucky bluegrass.

To maintain the turf, Bill recently purchased a Walker Model R. He says he wishes he had purchased a Walker many years prior: "I told Sandy that if I had bought a Walker 30 years ago, I am certain it would still be running because of how easy it is to work on, and I know the turf would have been beautiful all of these years."

Bill says the back yard at their residence continues to be a source of enjoyment. "We continue to do things for our grandkids to be able to enjoy visiting," shares Bill. "The perimeter path for the kids to ride their bikes is just the start; we are planning an in-ground trampoline as well."

Model S

The Model S is the quintessential Walker Mower. Inspired by the original 1977 prototype, the Model S is simple and easy to operate and very efficient at mowing residential properties. With Walker's Grass Handling System®, a patented Blower Shaft PTO® design, and reduced weight and cost, the Model S is the perfect entry-level mower for experiencing Walker's signature beautiful cut and zero-turn productivity.

Model S Standard Features

- High capacity, commercial engine air filtration
- Precision steering system
- Forward Speed Control
- Hydro-Gear ZT3100 transmissions
- Tilt-up decks and tilt-open body
- Flexible deck-carrier frame
- Grass Handling System® (GHS)
- 12.75 inch (32.38 cm) Thru-Shaft® PTO GHS blower
- Oscillating PowerFil® chute with Grass-Pak® full signal
- 7 bushel (8.7 cu. ft.) grass catcher

Model S Popular Add-ons

- Power Dump
- LED Headlights
- Adjustable Footrests
- Dethatcher
- 48 inch (121.92 cm) Dozer Blade
- 36 inch (91.44 cm) Single-Stage Snowblower
- Spyker Spreader and Mount

S14i

- 14 HP Kohler Command Pro EFI engine
- Superior fuel efficiency
- 6.5 MPH (10.5 km/h) ground speed
- 1.9 gallon (7.2 liter) fuel tank
- Deck options: 3 collection, 3 mulching, 2 discharge

S18

- 18 HP Briggs and Stratton Vanguard engine
- Increased displacement and torque
- 7.4 MPH (11.9 km/h) ground speed
- 4 gallon (15.1 liter) fuel tank
- Deck options: 5 collection, 4 mulching, 5 discharge

Pictured: S18 with a 48 inch (121.92 cm) collection deck

Model C

The Model C is the original Walker commercial lawn mower. Since its introduction in 1986, the Model C has been continually refined and improved with the commercial operator in mind, especially those who maintain residential properties. The Model C is a compact and versatile mower with impressive productivity.

Model C Standard Features

- High capacity, commercial engine air filtration
- Precision steering system
- Forward Speed Control
- Eaton Model 7 transmission with ductile cast iron gearbox final drive
- Tilt-up deck and tilt-open body
- Flexible deck-carrier frame
- 4 gallon (15.1 liter) fuel tank
- Grass Handling System® (GHS)
- 10.5 inch (26.67 cm) GHS blower
- Oscillating PowerFil® chute with Grass-Pak® full signal
- 7 bushel (8.7 cu. ft.) grass catcher

Model C Popular Add-ons

- LED Headlights
- Comfort Seat
- Dethatcher
- Operator Soft Cab
- Implement Hitch with electric ram lift
- 42 inch (106.68 cm) Two-Stage Snowblower
- Power Dump
- 48 inch (121.92 cm) Dozer Blade

C19

- 19 HP Kohler Command Pro CH620 engine
- Entry level commercial mower
- Deck options: 6 collection, 4 mulching, 7 discharge

C19i

- 19 HP Kohler Command Pro ECH630 EFI engine
- Superior fuel efficiency
- Deck options: 7 collection, 4 mulching, 7 discharge

Pictured: C19i with a 42 inch (106.68 cm) collection deck

See more details at: walker.com/model-c

Model *T*

The Model T is the standard for what commercial operators expect from a lawn mower. Intended specifically for commercial use, every aspect of the Model T has been designed to meet the most demanding expectations of operators who want fast and easy mowing with beautiful results. It is the go-to Walker for commercial operations and a favorite among discerning customers.

Model T Standard Features

- Commercial air filter with remote air intake and turbine pre-cleaner
- Precision steering system
- Forward Speed Control
- Eaton Model 7 transmission with ductile cast iron gearbox final drive
- Flexible deck-carrier frame
- Tilt-up deck and tilt-open body
- 4.7 gallon (17.8 liter) fuel tank
- Grass Handling System® (GHS)
- 10.5 inch (26.67 cm) GHS blower
- Oscillating PowerFil® chute with Grass-Pak® full signal
- 10 bushel (12.4 cu. ft.) grass catcher

Model T Popular Add-ons

- Hi-Dump® grass catcher system raises 67 inches (170.18 cm) with automatic catcher door actuation
- Power Dump
- LED Headlights
- Dethatcher
- Implement Hitch with electric ram lift
- 42 inch (106.68 cm) Two-Stage Snowblower
- 48 inch (121.92 cm) Dozer Blade
- Spyker Spreader and Mount

T₂₃

- 23 HP Kohler Command Pro CH680 engine
- Commercial mower with carbureted engine
- Comfort Seat with optional armrests
- Non-collection version is available
- Deck options: 7 collection, 5 mulching, 8 discharge

Pictured: T23 with a 48 inch (121.92 cm) collection deck

T_{27i}

- 26.5 HP Kohler Command Pro ECH749 EFI engine
- Superior fuel efficiency
- Simple, reliable operation with easy starting
- Comfort Seat with optional armrests
- Non-collection version is available
- Deck options: 7 collection, 5 mulching, 8 discharge

See more details at: walker.com/model-t

Model *D*

The Model D is an industrial-grade Walker Mower with impressive power and agility. The Model D is the only diesel-powered Walker Mower equipped with the Walker Grass Handling System® (GHS). The Model D effortlessly handles the harshest mowing environments and extended running times without compromising efficiency or power.

Model D Standard Features

- Automatic glow plug preheat
- Transverse engine mount
- Liquid-cooled with self-cleaning radiator
- Impressive 34 ft-lb torque
- High-capacity, commercial-engine air filtration
- Precision steering system
- Forward Speed Control
- Eaton Model 7 transmission with ductile cast iron gearbox final drive
- Grammer 4-way adjustable Suspension Seat
- Tilt-up deck and tilt-open body
- Flexible deck-carrier frame
- High output 40-amp charging system
- Grass Handling System® (GHS)
- 10.5 inch (26.67 cm) GHS blower
- Oscillating PowerFil® chute with Grass-Pak® full signal

Model D Popular Add-ons

- Hi-Dump® grass catcher system raises 67 inches (170.18 cm) with automatic catcher door actuation
- Power Dump
- LED Headlights
- Dethatcher
- Operator Soft Cab
- Implement Hitch with electric ram lift
- 42 inch (106.68 cm) Two-Stage Snowblower
- 48 inch (121.92 cm) Dozer Blade

D21d

- 20.9 HP three cylinder Kubota D722 diesel engine
- 10 bushel (12.4 cu. ft.) grass catcher
- Deck options: 7 collection, 5 mulching, 8 discharge

Pictured: D21d with a 52 inch (132.08 cm) collection deck

See more details at: walker.com/model-d

Model *R*

The Model R is the perfect Walker Mower for residential properties. The belt-driven mower blades make operation smooth and quiet without compromising on the Walker Mower's distinct advantages. The Model R provides a premium Walker experience so you can bring home fast, easy, beautiful mowing.

Model R Standard Features

- 21 HP Kohler KT620 with Smart-Choke® technology for easy starts in hot and cold weather
- Hydro-Gear EZT transmissions
- Ogura® electric blade clutch and brake with easy pull/push switch operation
- Tilt-up deck and tilt-open seat
- 3 gallon (11.4 liter) custom molded, low profile fuel tank with integrated fuel level gauge
- Flexible deck-carrier frame
- Precision steering lever control system
- Forward Speed Control
- Two drive belts with spring-loaded tensioning idler pulleys: ground drive and blade drive

Model R Popular Add-ons

- Comfort Seat
- Tow Hitch
- Mulching Kit including bolt-in baffles and serrated mulching blades
- Accelerator® 3.3 bushel (4.2 cu. ft.) side-mount grass catcher
- LED Light Kit

3 YEAR
300 HRS

The Model R features a 3-year, 300 hour, caster-to-caster residential warranty. All parts and components are covered against manufacturer's defect.

R₂₁ with S42 deck

- 42 inch (106.68 cm) cutting width
- Belt-driven blades with dampened belt tensioner for smooth, quiet operation
- Custom blade spindles with grease zerk and bleed valve
- Molded rubber side discharge deflector shield

R₂₁ with S48 deck

- 48 inch (121.92 cm) cutting width
- Belt-driven blades with dampened belt tensioner for smooth, quiet operation
- Custom blade spindles with grease zerk and bleed valve
- Molded rubber side discharge deflector shield

Pictured: R21 with a 48 inch (121.92 cm) side discharge deck

See more details at: walker.com/model-r

Model *B*

The Model B is compact and fast. It is a Walker Mower designed to run side discharge and mulch decks on difficult properties with hills, uneven terrain, and obstacles, while leaving a beautiful cut. The Model B is configurable and versatile to meet a professional's expectations.

Model B Standard Features

- High-capacity, commercial engine air filtration
- Precision steering system
- Forward Speed Control
- Hydro-Gear ZT3100 transmissions
- Flexible deck-carrier frame
- Tilt-up deck and tilt-open body

Model B Popular Add-ons

- Utility Bed
- LED Headlights
- Suspension Seat
- Dethatcher
- 48 inch (121.92 cm) Dozer Blade
- 36 inch (91.44 cm) Single-Stage Snowblower
- Spyker Spreader and Mount
- Big Tire Kit

B27i

- 26.5 HP Kohler Command Pro ECH749 EFI engine
- Superior fuel efficiency and economy
- Integrated electric Ogura® electric clutch with Soft Start
- Comfort Seat
- 4.7 gallon (17.8 liter) fuel tank
- Deck options: 5 mulching, 7 discharge

Pictured: B27i with a 52 inch (132.08 cm) mulching deck

See more details at: walker.com/model-b

Model *H*

The Walker Model H stands alone in its class for high production mowing and improved return on investment. When fast, beautiful results are demanded on vastly different properties, turf types, and conditions, the Model H delivers for the most discerning operators. A variety of attachments and add-ons keep the Model H productive year-round with excellent results.

Model H Standard Features

- Grammer 4-way adjustable Suspension Seat
- High capacity, commercial engine air filtration
- Precision steering system
- Hydro-Gear ZT3400 transmissions
- 3 Model H-specific mowing decks with integrated Deck Height Adjuster and Adjustable Foot Rest
- Flexible deck carrier frame
- Tilt-up deck and tilt-open body
- 9.4 gallon (35.6 liter) fuel capacity, dual tanks
- Deck options: 1 mulching, 9 discharge

Model H Popular Add-ons

- Power Tilt-Up® deck lift
- Operator Hard Cab
- LED Headlights
- Deck arm adapter kit, allowing compatibility with 6 additional Walker mowing decks
- Implement Hitch with electric ram lift
- 50 inch (127.00 cm) Two-Stage Snowblower
- 60 inch (152.40 cm) Rotary Broom
- 60 inch (152.40 cm) Dozer Blade

H27i

- 26.5 HP Kohler Command Pro ECH749 EFI engine
- Superior fuel efficiency
- Lightest weight Model H, minimizing tire marks and turf damage

H24d

- 23.7 HP Kohler KDW1003 diesel engine
- Automatic glow plug preheat
- Rubber isolation engine mounts
- Liquid cooled with self-cleaning radiator
- Standard ROPS and Utility Bed

H37i

- 37 HP Briggs and Stratton Vanguard Delphi fuel injected engine
- Superior fuel efficiency
- High output 50-amp charging system

Pictured: H37i (left, middle) and H24d (right) both with a 64 inch (162.56 cm) rear discharge deck

Customer Profile: *Spring Green Landscaping*

Paul Camara of Spring Green Landscaping in Exeter, Rhode Island, is a craftsman, plain and simple. This third generation business owner has a natural eye for excellence, and an old-school bent for hard work, with beautifully finished results as his primary enjoyment. Paul is a hands-on owner who, along with his three employees, fill their five-day work week with the maintenance, including bed, plant, tree and lawn care, for 15 estate properties along the coast of Rhode Island.

Even though Spring Green only cuts lawns for two days a week, Paul says the Walker plays a critical role in Spring Green's success in maintaining these beautiful properties. "Without a doubt, we have to make the lawns look as good as the rest of the properties, and we have found no other mower gives us the finished quality like we get with the Walker Mower."

Camara says his company's reputation depends on the work they produce using the right tools. "Our ongoing success relies on our customers knowing that they are receiving the best care on their entire property whether we are trimming a tree, shaping a bush or striping a lawn."

"Our ongoing success relies on our customers knowing that they are receiving the best care on their entire property, whether we are trimming a tree, shaping a bush or striping a lawn."

Paul Camara
*Spring Green Landscaping,
Exeter, Rhode Island*

Decks

Each Walker deck is uniquely configured to meet a very specific performance need. Whether the most important consideration in looking for the perfect deck is cutting width, handling grass clippings, material capacity, or grass type, there is a Walker deck that will meet the specific maintenance need.

Pictured: B27i with a 52 inch (132.08 cm) mulching deck

Mulching Decks

Mulching decks are designed to efficiently re-cut material to fine particles and return them to the turf, leaving a beautiful cut.

Reverse Rotation

Standard vs Reverse Rotation

Standard rotation blades come together at the front of the deck, moving material directly into the rear discharge chute. Standard rotation decks are ideal for users who need to collect thick, heavy clippings, including leaves and other yard debris.

Reverse rotation blades come together at the rear of the deck, moving material around the edges of the deck before it is channeled into the discharge chute. Reverse rotation decks are ideal for users looking for exceptional cut quality, in mowing conditions without wet, heavy clippings or debris.

(Model H only)

Gear vs Belt Drive

Walker gear-driven decks utilize aluminum or cast iron gearboxes with bevel Zerol gear technology for durable and quiet function. The timed blades provide exceptional cut quality and striping, and allow a compact design for improved trimming and maneuverability.

Walker belt-driven decks use a robust spindle and belt-tensioning idler design, and are best suited for rougher mowing conditions with debris or ground contact occurring. Walker belt-driven decks feature tool-free belt change and easy-to-maintain spindles and components.

Multi-Deck

Designed for customers who need to collect and side discharge throughout the season, the Walker Multi-Deck is a cost effective way to have two mowing styles in a single deck. This quiet, belt-driven deck uses a torsion-flex carrier to freely articulate and follow ground contour for a beautiful cut. And, like other Walker decks, the underside and blades are accessible with the tilt-up function for easy transition between configurations and maintenance.

Customer Profile: ***Blueville Nursery***

No matter what the four seasons bring to the Manhattan, Kansas area, the seven landscape maintenances crews of Blueville Nursery will be in action with their fleet of Walker Mowers. During the heavy grass growth of spring, it will be Walker collection decks paired with their GHS equipped mowers. In the summer heat, it will be efficient mulching decks for increased productivity and healthy turf. When the leaves of autumn start flying, Blueville shifts back to Walker collection decks for leaf cleanups. And, when winter snow starts piling up, the Walker Mower paired with a Walker Dozer Blade or Snowblower makes quick work of winter cleanup.

Jade Barta, Maintenance Division Head for Blueville Nursery, says the Walker is key to the year-round success of the company. He points to the Walker's compact design and precision steering and handling as two of his favorite advantages. "With the Walker, we can do a better job than larger mowers on the lawns. Plus, in winter, we are so much more efficient than walk-behind snowblowers. Whether we are handling eight inches of snow or ice, collecting leaves or just making lawns beautiful in the summer, the Walker is a key part of our efficiency while also keeping our customers satisfied."

"I'm a numbers guy, and if we are not making a 20% profit year-round, I am not doing my job. With the Walker we can do a better job than larger mowers on the lawns and are so much more efficient than walk behind snowblowers"

Jade Barta
Maintenance Division Head
Blueville Nursery, Manhattan, Kansas

Add-ons: Implements

Implements mount interchangeably on most Walker models using the quick-change hitch system and require the use of the Implement Hitch. Tail Weights may also be needed for counterbalancing.

Implement Hitch

The Implement Hitch replaces the mower deck and installs on the tractor in just a few minutes. Implements then slide onto the hitch and lock in place with the flip of a lever for true “quick-change” capability. The Hitch assembly includes operator footrests and an electric

power lift. A switch raises and lowers implements and is quadrant mounted on the Forward Speed Control lever for convenient operation.

Models C, T, D:..... **P/N H10**

Model H: **P/N H19**

Option: Tail Weights

Tail weights are used for counterbalancing many Walker front-mounted add-ons such as a snowblower, loader bucket, or rotary broom. Tail weights also improve handling when using large decks on the lighter models. The cast-iron weights bolt directly to the chassis frame or the split-axle tail.

Model B: 10 lb..... **P/N 2647-3**

Model H: 50 lb **P/N 2647-10**

Model H: 55 lb..... **P/N 2647-11**

Extra 55 lb weight **P/N 2647-6**

Model C, T, D: 85 lb..... **P/N 7647**

Extra 10 lb weight..... **P/N 7647-5**

Rotary Broom

The Rotary Broom, with a 47" or 60" sweeping path and five-position angle head, is ideal for sweeping debris or light snow from hard surfaces.

The Rotary Broom excels at sweeping and removing gravel and debris from turf areas along roads, paths, and playing fields, and can also be used for lawn dethatching and raking. Down pressure is spring counter-weighted and is adjustable for great sweeping action and minimum brush wear. The Rotary Broom is another way to extend the usability of the Walker commercial riding lawn mower. Requires Implement Hitch (see page 34).

Models C, T, D: 47"P/N H13

Model H: 60"P/N H20

Optional Gauge Wheels are available to better control depth of brush engagement. It is especially useful when working on turf. **P/N 1399**

Dozer Blade (48" or 60")

The Dozer Blade is a powerful tool able to tackle a variety of tasks, from cleaning up after a snow storm to backfilling irrigation trenches. It is designed and built by Walker, using the latest fabrication technology, precision tooling, and quality workmanship.

Blade design features a simple foot-actuated angle-adjust mechanism that allows the operator to quickly set the blade to five different positions, and also employs trip-over protection with adjustable preload. The steel cutting edge is replaceable, with four mounting positions for extended life.

Requires Implement Hitch (see page 34).

Models C, T, D, H: 48" (121.92 cm)..... P/N H11

Models T, D, H: 60" (152.4 cm)..... P/N H16

An optional Polyurethane Wear Strip Kit is available for use on sensitive surfaces:

48" (121.92 cm) P/N 6625-10

60" (152.4 cm)..... P/N 6625-11

Loader Bucket

A versatile tool for landscaping work, the Loader Bucket will push, scoop, haul and grade dirt, stone, gravel, and mulch. It lifts approximately 180 lb (82kg), holds 2.25 cu. ft. (64 liter) of material, and features 14" (35.56 cm) ground clearance for transport. The Loader Bucket has a high-strength steel cutting edge with tilting action, is powered by a 500 lb electric ram. It is available for use on models C, T, and D. It requires an Implement Hitch (see page 34). **P/N H18**

Debris Blower

Useful for landscape clean-up and leaf removal, the Debris Blower quickly mounts to the Implement Hitch and gives the Walker Mower owner full three-season use.

The 13.5" (34.29 cm) Debris Blower delivers 125 MPH velocity and a 230 degree manual directional control. The same high-quality construction found in each of our commercial mowers is built into this and each implement we offer. It requires an Implement Hitch (see page 34).

P/N H14

Two-Stage Snowblower (42" or 50")

This powerful add-on throws snow up to 40 feet (12.192 meters) with a directional discharge spout that can be adjusted 228 degrees from the operator seat. The chute pitch-adjustment allows for fine control of throw angle and distance, and comes with an optional electric control kit. With the electric height-adjustment of the Implement Hitch, the Snowblower will make quick work of even the deepest of snowfalls. It requires an Implement Hitch (see page 34).

Models C, D, T, H: 42" (106.68 cm)..... P/N H12

Model H: 50" (127.00 cm)..... P/N H17

Optional Chute Control Kit:
P/N 6623-4

Add-ons: Attachments

Attachments mount interchangeably on most Walker models and do not require the use of an Implement Hitch. Some attachments replace the deck, while others attach to the deck or to the tractor body.

Hard Cab

The Hard Cab shields the operator from winter weather when using a Snowblower, Rotary Broom or Dozer Blade. It includes two hinged doors, glass windshield with electric windshield wiper, LED headlights, and circulation fan. It requires a ROPS kit for mounting (see page 39).

Model H: **P/N A33**

Optional Operator Cab Heater (use only with H37i): **P/N 2200-24**

Soft Cab

The Soft Cab shields the operator from winter weather when using a Snowblower, Rotary Broom or Dozer Blade. It features a hinged door with glass windshield, electric windshield wiper, and LED Headlights.

Model C: **P/N A13**

Models D or T: **P/N A14**

Front Cab Extension Flap (protects operator when using Dozer Blade):
P/N 7661-4

ROPS

The Walker Roll-Over Protection Structure (ROPS) consists of a high-strength steel roll bar and retracting inertial-reel seat belt. The ROPS system features a hinged roll bar that can be folded down for convenient transport and storage.

Models H27i, H24d..... P/N A30

Model H37i..... P/N A34

Models C, D, T..... P/N A37

Single-Stage Snowblower 36"

Just the right size for tackling sidewalks and driveways, the 36" (91.44 cm) Single-Stage Snowblower attachment mounts directly in place of the mower deck in just a few minutes. A simple manual lifting mechanism and footrests are integrated with the Snowblower mount. No separate implement hitch is required. The Snowblower is compatible with models S, C, T, D, and B. The Snowblower is the perfect winter season add-on to give the Walker year-round versatility. It is a compact, powerful addition to the Walker Mower, throwing snow up to 20 feet. **P/N A11**

Spyker Spreader Attachment

The Spyker Spreader Attachment combines a Spyker S80-12010 Pro-Series Spreader with the versatile Walker Mower. No tools are needed to secure the spreader to the carrier frame of the Walker 42 inch, 48 inch, or 52 inch gear-driven decks.

Spyker Spreader and Mount..... P/N A39

Spyker Spreader Mount only..... P/N A38

Dethatcher

The Dethatcher on the front of the Walker Mower is the ideal setup to quickly dethatch and mow a property. When used with the Grass Handling System on Models S, C, T, and D, lawn thatch and debris are lifted, vacuumed, and collected in one pass. The Dethatcher features front-gauge wheels which allow the dethatching tines to maintain consistent depth on uneven or articulating properties.

The Dethatcher quickly attaches to the front of most 36", 42", 48", and 52" Walker gear-driven decks with integrated adjustable mounting saddles. A lift lever with foot trigger lowers and raises the Dethatcher for easy transport when driving between lawn areas. Gauge wheels are adjustable to set and tune tine depth. The foldable handle allows the Dethatcher to be stored vertically against a shop wall or tied down against a trailer sidewall. **P/N A10**

Optional Wall Mount:
Securely and compactly mount the Dethatcher off the floor in a space-saving manner on your shop or garage wall. **P/N 6606-11**

Boom Sprayer

A helpful attachment for property maintenance, the Boom Sprayer easily mounts to all 42", 48", 52", 56", and 62" Walker decks, and offers a 96" (243.84 cm) spray pattern, allowing operators to apply fertilizer or weed control in an efficient manner.

A spray gun with a 20-foot (6.09 meter) hose allows the operator to leave the mower and apply liquid material to all landscape features. The spray tip adjusts to offer varying output, from a mist to a 35-foot (10.66 cm) stream. The 25-gallon (94.63 liter) tank allows easy cleaning of the tank and spray system. **P/N A16**

Mounting on 52" & 62" decks requires two Rear Sprayer Supports **P/N B037**

48" Dozer Blade

Developed to provide a durable, simple, and productive attachment for the Walker, the Dozer Blade incorporates a manual lifting mechanism not requiring an implement hitch. The Dozer Blade features a foot-actuated, angle-adjust mechanism that allows the operator to quickly set the blade to five different angles. The blade employs trip-over protection with adjustable preload to allow operators to focus on productivity, and not on what is hiding under the snow or dirt. A replaceable steel wear strip comes standard, and an optional polyurethane wear strip is also available. **P/N A32**

Adapter kits are required for using the A32 Dozer Blade:

Models B, S..... P/N 4300-16

Models C, T, D..... P/N 5628-10

Options are available for the A32 Dozer Blade:

Polyurethane Wear Strip Kit 48" P/N 6625-10

Blade Attachment Power Lift Kit P/N 6622-17

Add-ons: Options

Comfort Seat

The Comfort Seat (shown left) is custom-designed with improved seat-bolstering and back profile for increased posture and support. The base cushion features Elastometric Vibration Control which greatly increases comfort during operation.

The Comfort Seat cover is made of marine grade, UV resistant industrial vinyl and features impermeable contrasting yellow stitching and subdued Walker branding embroidered on the seat back. The wear-resistant seat cover is easily replaceable. Matching armrests are available as an optional upgrade. The comfort seat comes standard on Models T and B.

<i>Models T, D.....</i>	<i>P/N 6104-8</i>
<i>Models B, S, C</i>	<i>P/N 6104-9</i>
<i>Model R.....</i>	<i>P/N 6104-10</i>
<i>Optional Armrests.....</i>	<i>P/N 6104-6</i>

Suspension Seat

Made by Grammer, this full-spring Suspension Seat includes dampening and adjustments for back angle, lumbar support and operator weight. Armrests are standard on the Suspension Seat. It is standard on Models D21d and H24d.

<i>Model B.....</i>	<i>P/N 4103-1</i>
<i>Model C.....</i>	<i>P/N 6103-43</i>
<i>Model T.....</i>	<i>P/N 6103-46</i>
<i>Models D, H.....</i>	<i>P/N 6103-14</i>

Armrests

Foldable armrests can be added to the Comfort or Standard Seat. They offer enhanced operator comfort and security. Armrests conveniently fold up when not in use. Armrests are standard equipment on the Suspension Seat.

<i>Standard Seat: P/N 5885</i>
<i>Comfort Seat: P/N 6104-6</i>

Utility Bed

The Utility Bed can replace the rear body assembly on the Model B, providing convenient storage and transport of material or tools. With manual dump functionality, the Utility Bed also adds all-season versatility to the Model B or H24d. It is standard on Models H24d, and the non-collection versions of T23, T27i, and D21d. **P/N 4650-2**

Headlights

The LED Headlights incorporate a durable, cast aluminum housing with five LED lamps in each light assembly. The lights are positioned to illuminate the front and sides of the mower deck, providing increased situational awareness and safety for both the operator and bystanders.

<i>Models B, C, H27i, H24d</i>	<i>P/N 5989-13</i>
<i>Model S</i>	<i>P/N 5989-14</i>
<i>Model R.....</i>	<i>P/N 5989-15</i>
<i>Models D, T.....</i>	<i>P/N 7989-14</i>
<i>Model H37i.....</i>	<i>P/N 2989-12</i>

Cup Holder

Featuring a unique front-mount design, the Cup Holder gives the operator easy access to his or her drink. The Cup Holder frame is powder-coated metal and incorporates rubber tabs to secure different sized and shaped cups and tumblers up to 3.25 inches in diameter. It is not Model R compatible. **P/N 5744-9**

Instrument Panel Cover

This sturdy canvas Instrument Panel Cover protects the instrument panel on Walker Models D and T when parked outside or trailered in rain or snow. **P/N 7307-2**

Power Dump

The Walker Power Dump provides convenience and time-saving to commercial mowing companies and homeowners alike by giving the operator the ability to dump the grass catcher from the operator seat. A toggle switch operates the 12-volt electric linear actuator that provides the dumping and door-opening action, which completes in about 10 seconds.

Model S14i.....P/N 7620-17

Model S18.....P/N 7620-18

Model C.....P/N 7620-14

Models T, D.....P/N 8620-2

Hi-Dump®

The Walker Hi-Dump® raises up 67 inches (170.18 cm) and dumps collected grass and debris into a truck or trailer in a 20-second cycle without the operator ever needing to leave the seat. Powered by a 12-volt electric/hydraulic system, the lifting and dumping functions work independently and are controlled by two toggle switches near the operator's seat. It is available for Models D and T. **P/N A21**

Large Hole Screen

When mowing in wet conditions, this screen with 3/4" holes stays cleaner to help prevent clogging. This screen easily interchanges with the standard screen.

7.0 bu. Catcher:

P/N 7512-7

10.0 bu. Catcher:

P/N 7512-11

No-Catch Deflector

The No-Catch Deflector easily installs in the grass catcher door frame to allow "non-collection" rear-discharge mowing with GHS models. Grass clippings are safely deflected downward and spread across the door opening.

7.0 bu. Catcher:

P/N 7500-2

10.0 bu. Catcher:

P/N 8500-2

GHS Blower Lockout

The Blower Lockout disengages the Grass Handling System® (GHS) blower to reduce noise and increase power when using a side discharge deck, mulching deck or PTO-driven attachment or implement. Disengaging the blower also prevents grass, snow, or debris from entering the grass catcher. **P/N 7541-1**

Dump Bag

The reusable, fabric Dump Bag helps make on-the-job cleanup a lot easier. It is sized to fit the grass catcher door opening, allowing the operator to cleanly handle clippings and easily transport them.

9.5 bu. Catcher:

P/N 5598

10.0 bu. Catcher:

P/N 5598-2

Dump Bins

These two bins slide into the Walker 10-bushel catcher, making the dumping of grass clippings much easier by dividing the clippings in half. This is especially useful for single operators working by themselves.

Set of Dump Bins.....P/N 8510-11

Left Side Dump BinP/N 8510-9

Right Side Dump Bin.....P/N 8510-10

Deck Height Adjuster

The mechanical Deck Height Adjuster installs directly onto the Walker mowing deck. It offers quick and easy cutting height adjustments in 1/4 inch increments, using a single hand lever within reach of the operator's seat.

S56.....	P/N A28
C42R.....	P/N A29

*A26 SN 163318 and prior S52 decks.

**A27 SN 187999 and prior S62 decks.

Deck Height Washers

Deck Height Washers allow finer adjustments of cutting height on compatible decks. Use these to adjust deck height by 1/4 inch.

36", 42", 48", 52", and 56" gear drive decks.....P/N 5727-1
52", 62" belt drive, 74" gear drive decks.....P/N 8727

Curb Jumper

This 40 inch (101.60 cm) wide curb ramp allows Walker Mowers to easily back over a standard curb for access to medians, landscape areas in parking lots, and raised beds. When not in use, the ramp stows on the mowing deck carrier frame and functions as an expanded footrest.

Standard Decks P/N 5597, Deck Height Adjuster Decks P/N 5597-1

Power Tilt-Up®

Available for the Model H, the Power Tilt-Up® makes it easy to automatically tilt up decks for maintenance, transportation and storage. Tilt-up action uses a 12-volt electric linear-actuator easily mounted to any Model H mower equipped with an S61, R52, or R64 deck with adjustable footrests. The use of a tailweight is suggested (see page 34).

Models H27i, H37i P/N A35

Model H24d P/N A36

Deck Lift

The Deck Lift raises the front casters of the deck a few inches off the ground to avoid wear and tear on the deck while transporting. The Deck Lift mounts directly to a Walker tractor and deck. Compatible only when Standard Seat is installed.

Model B P/N 4645

Models C, T, D P/N 8645

Break Away Blades

Use Break Away Blades in mowing conditions with frequent ground contact and/or excessive debris. Break Away Blades lessen the impact and shock loading on the deck drive-train and reduce blade damage. Cutting blades can be easily replaced or removed for sharpening.

S56 P/N 5705-32

S42 P/N 5705-33

S74 P/N 5705-34

S48 P/N 7705-8

Adjustable Footrests

These Adjustable Footrests clamp onto the carrier frame. They are easy to install and adjust, making for a comfortable ride for operators with shorter legs.

36", 42", 48", 52" P/N 8662-10

S74 P/N 8662-9

Deck Cuff

Airflow and deck contour tend to push grass at the very edges of the deck away from the cutting blades. The Deck Cuff acts as a channel to direct grass at the edge of the deck into the blade cutting path, restoring full deck cutting width.

C36R..... P/N 7704-2

C48R..... P/N 7704-4

C52R..... P/N 7704-5

Spread Axle Tail Wheel

The Spread Axle Tail Wheels track in line with the drive tires for grass conditions where the center tail wheel track may not be preferred. This offers a clean look to the striping, improves straight tracking, and also contributes to stability when operating on hillsides.

Spread Axle Assembly..... P/N 7420-3

Tank Relocation Kit Required for D21..... P/N 7420-8

Dual Tail Wheel

The Dual Tail Wheel comes standard on Models T and D. Featuring two independent pneumatic tires, it offers less turning resistance than the Single Wide Tail Wheel, offering mowing with greater agility and precision. **P/N 7420-20**

Single Wide Tail Wheel

The Single Wide Tail Wheel creates a single, uniform tire stripe in the middle of the cutting width for a clean-looking stripe-pattern. It is not recommended for delicate turf, D Models, or machines equipped with a Hi-Dump® due to the increased turning friction at the contact patch of the tail wheel. **P/N 8049**

Tail Wheel Lock

The Tail Wheel Lock uses a locking solenoid and detent to hold the tail wheel into a "straight ahead" position. This dramatically improves the ability to create straight stripes and stability for hillside mowing. An On/Off toggle switch located on the Forward Speed Control makes it easy to control from the operator seat. **P/N 8540**

18 x 7-8 Turf Tire

The 18 x 7-8 Turf Tire is ideal for use with narrow decks, attachments, or implements. With these tires, the overall width of the tractor stays within the cut width of Walker's 36 inch decks. These tires come standard on the Model S14i. **P/N 5033-6**

18 x 7-8 Directional AT Tire

The 18 x 7-8 AT Tire features a high-traction, directional tread. It is ideal for increased traction in a variety of situations such as snow removal, dirt work, and mowing where a narrow, aggressive tire is needed. It is perfectly paired with the 36 inch Single-Stage Snowblower, the 48 inch Dozer Blade, or 36 and 42 inch decks.

Left Drive Tire: P/N 5034-1

Right Drive Tire: P/N 5034-2

18 x 8.5-10 Turf Tire

The 18 x 8.5-10 Turf Tire features a low profile sidewall for increased stability on slopes and less sidewall flex in turns. The 18 x 8.5-10 Turf Tire keeps overall tractor width less than 42 inches, ideal for narrower decks, attachments, or implements. This tire is standard on Models B, C, S18, and Models T and D with ROPS. **P/N 5075-3**

18 x 8.5-10 AT Tire

These aggressive 18 x 8.5-10 high-traction tires feature increased traction useful for snow removal, dirt work, and other challenging mowing conditions. The tire width maximizes deck overhang for improved trimming capability, as well as dozer blade overhang to increase blade side reach. **P/N 8070-9**

18 x 9.5-8 Turf Tire

The 18 x 9.5-8 Turf Tire is a good balance of low ground pressure, operator comfort, and deck overhang for trimming ability. It is the standard tire on Model T and Model D Walker Mowers without ROPS. **P/N 7070-2**

18 x 10.5-10 Turf Tire

The 18 x 10.5-10 Turf Tire provides optimum traction and a large contact area, reducing ground pressure and protecting the turf. The low profile sidewall improves hillside handling. Due to its width, and for optional trimming, it should be paired with 48 inch or larger decks. **P/N 8075-4**

18 x 11-10 AT Tire

The 18 x 11-10 All Terrain Tire is ideal for increased traction in a variety of situations ranging from hillside mowing to snow removal. It also features a low profile sidewall for increased stability and performance. **P/N 8070-6**

22 x 10.5-12 Turf Tire

The 22 x 10.5-12 Turf Tire provides optimum traction while minimizing turf damage in normal mowing conditions for the Model H. This tire is standard on the Model H. **P/N 2071**

23 x 10.5-12 AT Tire

The 23 x 10.5-12 All-Trail Tire features a moderately aggressive, bi-directional tread pattern ideal for challenging turf applications. The All-Trail Tire improves traction and hillside performance for the Model H. **P/N 2071-2**

23 x 10.5-12 Directional AT Tire

The 23 x 10.5-12 Directional All-Terrain Tire provides improved traction for the Model H and is ideal for snow, dirt, and challenging mowing and implement conditions. The Directional AT tread layout is open enough to shed snow and mud, yet the tire rolls smoothly and performs well on manicured turf.

Left Tire: P/N 2070-5, Right Tire: P/N 2070-6

Pneumatic Deck Tire

For operators who like the ability to fine-tune the performance and ride of their Walker Deck, we offer a pneumatic tire option. The Pneumatic Deck Tires replace the standard semi-pneumatic tires and allow for adjustment of air pressure.

Tire and inner tube only: P/N 5715-15

Tire, inner tube, and wheel assembly: P/N 5715-17

Semi-Pneumatic Deck Tire

Never again experience the downtime of having a flat deck tire. The Semi-Pneumatic Deck Tires are molded, structural rubber with a hollow core, and come standard on most Walker Decks.

Tire, wheel and axle assembly: P/N 5715-22

Tire only: P/N 5715-16

Tire Chains

The Tire Chains are used for extra traction while working in snow with a Walker Snowblower, Rotary Broom or Dozer Blade. There are tire chains to fit every Walker model.

¹S6C: C42, T6D; C48, R: S48, H: R64, S: C36, C: C42, T & D: C48, R: 42" B: S48, H: R64, ²ROPS folded. Note: The A21 Hi-Dump Kit weighs 175 lbs (79 kg).

- Gasoline engines require unleaded 87+ octane
- Diesel engines require 2-D
- Full pressure lube systems with filter.
- S14i has mechanical splash lube system
- 12V electrical systems
- Flywheel alternator charging, D21d has belt-driven alternator
- Internal, mechanical parking brake
- Ignition lockout by seat switch, transmission neutral, blade clutch, and parking brake
- Electric blade clutch with easy pull/push switch operation on Models R and B27i
- Dual-lever steering, precision friction-lock Forward Speed Control lever with neutral/park position
- All machines feature dual, independent hydrostatic transmissions
- Cutting height 1.5" to 4", 1.5" to 4.5", or 1" to 5", varies per model
- Heavy-duty stamped steel cutting blades, tempered
- Blade clutch and brake with manual belt tightener
- Welded, heavy gauge, steel chassis
- Decks and add-ons powered by splined PTO shaft with dual u-joints allowing dynamic articulation, except for the Model R
- Deck carrier frame with flexible deck suspension, caster wheels, and counterweight springs
- Welded, 14 gauge steel bodies
- Welded, 11 gauge steel decks
