

Mid-Level Developer Role Definition

About Us

EV is a young, fast paced, growing FinTech company and the leading UK provider of financial planning and advice technology.

Working with over 80% of large financial institutions in the UK, EV's white labelled solutions were used by approximately 200,000 consumers and financial advisers in 2017.

We have 70+ talented integrated specialists, working across offices in Newbury and London.

The benefits of joining our exciting team

As well as offering fantastic opportunities for career progression once established in your role, you will be joining a friendly and relaxed working environment where you will be continuously supported and encouraged to reach your full potential. We have an open culture where you are encouraged to find and fix problems and not to pass them on to some other team. We are a great environment for makers and builders.

Sound like you?

We have fantastic benefits, including

- 25 days annual leave, bank holidays, one extra 'company day' for Christmas plus the option to buy a further five days annual leave
- Generous company pension scheme – up to 10% employer contribution
- Bonus
- Private medical
- Long term disability and Life Insurance
- Study support policy
- Free parking
- A huge range of free hot and cold drinks
- Excellent fully funded company events
- Weekly yogalates classes (on return to office)
- Company football team and Table Tennis team (on return to office)
- Poker nights with pizza! (on return to office)
- The opportunity to support local charities through fundraising events organised throughout the year

About the role

EV is recruiting for a highly motivated Mid-Level frontend developer with responsibility for the ongoing development, support and maintenance of our market-leading stochastic modelling solutions for the financial services industry.

You will be working hand in hand with senior members of the development team, Web designers, Product Owners and Actuarial testers to develop and deploy EV products.

You will be expected to work with the team to deliver high quality, robust solutions on schedule.

Required Knowledge and Experience

- All of our applications are web based, so we're looking for someone with solid experience building for the web.
- A solid working knowledge of **JavaScript and ReactJS**.
- **HTML5, CSS**
- Unit testing in Javascript frameworks (e.g. **Jest** or **Jasmine**)
- Database experience, preferably relational and document databases (**MySQL & MongoDB**)

Desirable Knowledge

Experience with any of the following would be very advantageous:

- Node/Express framework
- GraphQL/Apollo
- Automated testing using Cucumber & Selenium
- RESTful web services
- JQuery, Knockout
- Jenkins, OpenNebula, Docker, AWS
- NPM, Yarn
- GIT

- Working with business and product stakeholders to understand and deliver requirements.
- The ability to work with and improve someone else's code just as well as your own.

Qualifications

This is a mid-level position, so we'll be very interested in your experience to date. A large number of our developers have a degree in areas related to computing for example Computer Science, software engineering, IT, etc, however we hire based on talent and merit.

If you want to be part of a business that is looking to shape the future of financial services, contact us today!
