

# Technical Lead Role Definition

## About Us

EV is a young, fast paced, growing FinTech company and the leading UK provider of financial planning and advice technology.

Working with over 80% of large financial institutions in the UK, EV's white labelled solutions were used by approximately 200,000 consumers and financial advisers in 2017.

We have 70+ talented integrated specialists, working across offices in Newbury and London.

## The benefits of joining our exciting team

As well as offering fantastic opportunities for career progression once established in your role, you will be joining a friendly and relaxed working environment where you will be continuously supported and encouraged to reach your full potential. We have an open culture where you are encouraged to find and fix problems and not to pass them on to some other team. We are a great environment for makers and builders.

Sound like you?

We have fantastic benefits, including

- 25 days annual leave, bank holidays, one extra 'company day' for Christmas plus the option to buy a further five days annual leave
- Generous company pension scheme – up to 10% employer contribution
- Bonus
- Private medical
- Long term disability and Life Insurance
- Study support policy
- Free parking
- A huge range of free hot and cold drinks
- Excellent fully funded company events
- Weekly yogalates classes (on return to office)
- Company football team and Table Tennis team (on return to office)
- Poker nights with pizza! (on return to office)
- The opportunity to support local charities through fundraising events organised throughout the year

## About the role

EV are seeking an Experienced Software Engineer and Technical Leader who can lead a team of engineers in implementing EV's financial software solutions. You will need a positive, can do attitude, keen to get stuck in and solve problems. This is a hands-on role, so you will still need to be able to roll your sleeves up, but more importantly your role is to lead your team. We have some very talented and strong developers that need the support in growing, so you will need to mentor and share your knowledge and experience with them.

Working with other technical leads and the CTO in aligning the technical vision to the business objectives. You will ensure the team uses appropriate engineering practices (such as CI, CD, TDD ), and invests in continual improvements to tooling and technical debt, and that the system evolves to meet its changing needs and environment.

You'll have the opportunity to work with ground-breaking and cutting-edge tools whilst learning new and interesting technologies along the way.

The role reports to the CTO and works with our Propositions team to deliver EVs solutions and products

## Required Knowledge and Experience

You need in-depth knowledge and experience of building full stack systems and applications using: React, GraphQL, NodeJS, MongoDB, Docker and Kubernetes.

## Desirable Knowledge

Experience of working with TDD, DevOps CI/CD Jenkins Git/bitbucket, is desired.

Financial services experience would be a bonus but not essential. An ability and desire to learn and understand the purpose of the software is essential.

## Reporting Line

Reporting to the Chief Technical Officer
