*This preparation should be prepared in a vertical airflow hood in a biological safety cabinet or barrier isolation technology.

SUGGESTED COMPOUNDING PROCEDURES

1. Calculate the required quantity of each ingredient for the amount to be prepared
2. Accurately weigh and/or measure each ingredient
3. Mix the Peruvian Balsam with the Castor Oil
4. In a separate container, combine and heat in the Glyceryl Monostearate and white petrolatum using low heat water bath and mix well
5. Remove from heat, incorporate the Balsam-Castor Oil mixture slowly mixing well
6. Geometrically incorporate the Trypsin into the ointment mixing well.
7. Package and label
 - a. color
 - b. texture
 - c. container
 - d. Label - auxiliary labels, storage, BUD, compounded medication

*Apply very sparingly to affected area

* For External Use Only

* Keep away from mucous membranes

*Keep out of the reach of children

Store in air-tight container, room temperature away from excessive heat

No claims are made as to the safety or efficacy of this preparation. This formulation is provided solely at the unsolicited request of the pharmacist.

Beyond-Use Dates of preparations are conservative estimates from reference books, peer-reviewed literature, and intended duration of therapy, formulation from commercially available products, organoleptic observations and current USP guidelines. Compounders may have stability studies performed by a reputable laboratory if they wish to extend the Beyond-Use Date. It is recommended that you follow USP <795> recommendations for potency testing.

Beyond-Use Date should be assigned according to the current USP <795> Standards

Precautions:

Precautions should be taken to prevent cross-contamination and exposure of ingredients to the compounder and contamination of the preparation by the compounder. Wear appropriate protective equipment. Use safety enclosures (hoods) when weighing and mixing.
