THE RADIANS® ADVANTAGE

From ANSI Z87 impact resistant shooting glasses to premium electronic hearing protection to high visibility apparel, Radians safety gear is up for the challenge and meets the required safety regulations and standards.

Radians offers both performance and premium shooting glasses to meet the needs of first-time shooters or professional marksmen who demand the very best. We also carry a wide range of passive and electronic earmuffs and disposable and reusable earplugs.

BECAUSE COMFORT, FIT, AND STYLE MATTER

If it's not comfortable, safety gear may get left behind in the duffel bag. That's why Radians pays special attention to comfort features, such as wire core adjustable nosepieces, vented rubberized nosepieces, padded adjustable headbands on earmuffs, and gun stock cutouts.

RADIANS® CAPABILITIES & PROGRAMS GIVE OUR DISTRIBUTORS & RETAILERS THE COMPETITIVE ADVANTAGE

- Fast & economical custom imprinting for personalized branding
- Radians automated warehouse solution increases levels of customer service & satisfaction:
 - Real-time shipping information
 - Expediting same day orders more efficiently
- Crossfire retail displays for high-class merchandising of premium safety eyewear
- JUST IN TIME SHIPMENTS. Order in-stock product by 3 p.m. & it ships the same day

TESTING & STANDARDS

RADIANS® PERFORMANCE PROTECTIVE EYEWEAR

Because of our global presence and our culture of safety, Radians tests products to meet or exceed standards, including ANSI Z87.1, MIL-PRF-32432 Ballistic Fragmentation, CSA Z94.3, EN166, and AS/NZS 1337. Consumers can feel confident about Radians products meeting all necessary safety standards and regulations.

All Radians® and Crossfire® eyewear complies with ANSI Z87.1 impact standards, protects against 99.9% of harmful UV rays and includes a hard coat polycarbonate lens to protect against scratches.

STANDARD	IMPACT	CALIBER	PROJECTILE
ANSI Z87 + High Velocity	1500 feet / second 45 meters / second	0.25 inch diameter steel ball (25 caliber)	
MIL-PRF-32432 Ballistic Fragmentation	640-660 feet / second 195 meters / second	0.15 inch diameter steel projectile (15 caliber)	
High Mass Impact	17.6 oz / 50 in height 500 g / 127cm height	17.6 oz / 500 g pointed projectile dropped	

KNOW THE DIFFERENCE

Eyeglasses are **NOT** safety glasses unless both the lenses and frame are in compliance with the specifications for safety eyewear described in the ANSI Z87.1 Standard.

POLARIZED LENSES

Radians' polarized lenses prevent glare by filtering out the reflective bent light and glare, resulting in enhanced vision.

XTRACLEAR LENSES

Radians' XtraClear technology provides reduced distortion & enhanced clarity.

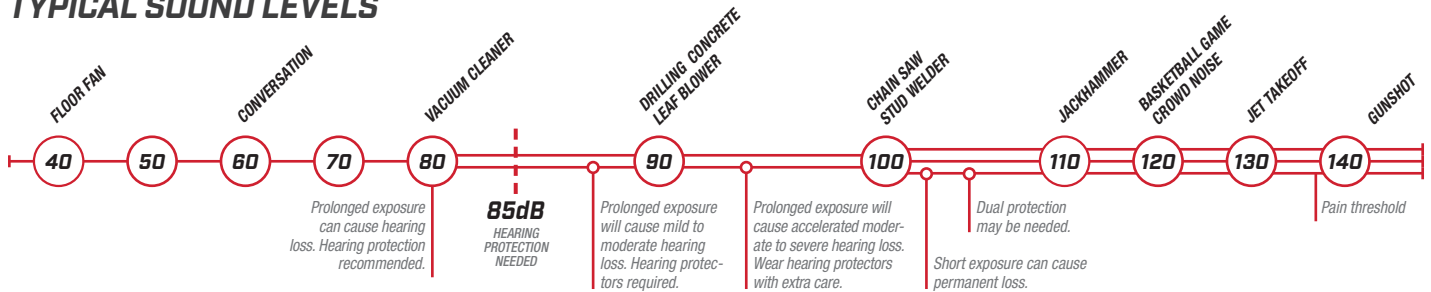

HEARING TESTING & STANDARDS

Radians® earned NVLAP Accreditation to test and certify hearing protective devices (NVLAP Lab # 500090-0). Accreditation, which is issued by the National Institute of Standards and Testing (NIST), allows Radians to perform accredited acoustical testing of hearing protection devices to the ANSI/ASA S3.19 and S12.6 standards. Radians' accredited lab is now a member of a very select group and viewed as a leader in the hearing protection industry.

TYPICAL SOUND LEVELS

dB (DECIBEL)

The unit used to express the intensity of sound. The decibel scale is a logarithmic scale in which 0 dB approximates the threshold of hearing in the mid frequencies for young adults. The threshold of discomfort is between 85 and 95 dB SPL, and the threshold for pain is between 120 and 140 dB SPL.

MADE IN THE USA

American consumers are becoming increasingly aware of the Made in USA labels and the impact they can have on our economy by purchasing American made products. Radians® is increasing the selection of Made in USA products every year. This initiative increases employment in the US, improves speed of replenishment and provides users with the option to 'Buy American,' when choosing personal protection products. The Made in USA range includes foam ear plugs, high visibility and reflective apparel, protective eyewear and lens cleaning accessories.

QUALITY ASSURANCE

The International Organization for Standardization (ISO) 9001:2015 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements. Our ISO 9001:2015 certification reinforces the Radians® commitment to quality assurance and to consistently manufacture and distribute quality personal safety products.

Crossfire® meets the demand for style and technology. All eyewear features scratch resistant hard coat polycarbonate lenses, 99% UVA/UVB protection from harmful sun exposure and exceeds the industry standards for impact and shatter resistance set forth by ANSI.

These products are tested to the same ANSI Z87.1+ standards for impact and shatter resistance as other Radians® safety glasses but in designs that reflect the most current styles, materials & colors.

Many Crossfire styles are available in amber, clear & smoke lenses, making them perfect for shooting at the range, hunting wild game, working in the workshop or riding ATVs. Regardless the adventure, Crossfire provides superior comfort, fit and protection.

ENHANCED OPTICAL CLARITY

The optically correct portion of the lens blank is pinpointed and marked at the focal point.

DE-CENTERED CUT LENS

The de-centered lens is cut to match the focal point with actual line of sight, ensuring optical clarity.

HD LENS TECHNOLOGY

Crossfire's High Definition (HD) Lens Technology provides enhanced vision by filtering the most damaging blue rays and allowing for less glare and better visual acuity.

MAXIMUS™

- Full size earcups for extended wear comfort
- Premium padded headband
- 2 pairs foam earplugs included
- * When Dual Protection is Used

Maximus Earmuff: 28 NRR
Deflector Foam Earplug: 33 NRR

Combined Attenuation: 38dB

* **DUAL USE ATTENUATION:** Due to the extreme noise levels produced by firearms, dual protection is recommended for maximum protection. Per the OSHA Technical Manual, attenuation provided by wearing dual protection such as earmuffs with earplugs can be estimated by adding 5dB to the higher of the two product NRR values. For example, with an earplug of 33 dB NRR and an earmuff of 28 dB NRR, combined attenuation can be estimated as 33 dB + 5 dB = 38 dB. Actual attenuation will vary by user.

WOMEN'S SAFETY GEAR

Women are the fastest growing segment of gun owners in the United States. While they enjoy both sport and leisure shooting, many are simply looking at gun ownership as a means of extra security and protection. Increased enrollment in gun safety courses, range use and gun permits for women means more women who want PPE that fits their size and their style while providing maximum comfort and protection.

LOWSET™

- Low profile earmuff

WARNING: Cancer and reproductive harm - www.P65Warnings.ca.gov

Shooting safely since age five and competing in local, state, and national shooting contests since age nine, Radians is a proud sponsor of Shyanne Roberts. She looks forward to participating in future competitions and attending the 2022 SHOT Show for the first time. Learn more about her.

You started shooting very young, how did you get started?

I started shooting when I was five and could recite all the safety rules on command. I got into shooting because my dad had always said from a young age that if firearms were going to be in the house, we kids were going to know the safety rules and how to use guns properly. When I could prove that I was being safe and knew all the safety rules by memory, my dad bought my first gun, a pink Cricket bolt action .22 rifle for my 6th birthday.

You've been competitively shooting for a while now, how many shooting competitions have you been in?

Since my first competition when I was nine-years old, I've shot roughly 100 matches local, state and national.

What are some rankings that you are most proud of?

My 5th Place Finish in Pre-Teen Rifle at the 2015 Smith and Wesson Steel Nationals. Others include multiple South Carolina Women's Pistol State titles.

What was your most challenging competition to date?

I would have to say... either the Lady 3-gun Pro Am or a Girl and a Gun Fall Fest. Both attracted some of the best and fiercest female competitive shooters in the country.

Your personal safety is very important – what do you look for in safety eyewear?

When I'm looking for eyewear to shoot in, I'm looking for something that's going to fit my face the right way, protect my eyes, and look good while I'm shooting. Radians has done an amazing job with fitting my needs and wants for my shooting eyewear and hearing protection.

What is your favorite type of hearing protection, passive or electronic, and why?

My favorite type of hearing protection would have to be the electronic ear pro from Radians – it provides me with the protection I need but also allows me to listen to the RSO and other team mates while I'm shooting.

What is your advice to new youth shooters who are interested in competitive shooting?

Practice, practice, practice and don't give up. You'll have good and bad days or days where you'll feel like you can't shoot any faster or better but you got this!

Why is it important to you to promote shooting safety?

I got into shooting though safety, and I think it is very important for everyone to know and follow the basic safety rules. I also believe that if you take away the curiosity that kids or even adults have about firearms by showing them how to properly use/handle guns in a safe manner, then there will be far fewer firearm related accidents.

You have had many experiences for such a young age, which will be meaningful to you throughout your life?

It would have to be all the opportunities I have had over the last several years to meet so many important people, compete with national level athletes, develop friendships with people from all across the country, and learning about our nation and politics through my sport.

What are some of your interests outside of shooting?

Playing lacrosse, horseback riding, hunting, fishing, and just generally being in the outdoors. I am strongly considering joining the military.

What are you looking most forward to in 2021?

I'm becoming a senior this year! ...Hopefully, with COVID dying down, I will be able to shoot in more competitions... And after waiting for so long, traveling to SHOT Show in Las Vegas to represent my incredible sponsors like Radians!

COOLING GEAR

If your work or hobbies involve the outdoors and unpleasant or even dangerously warm conditions, consider the comfort and protection of Arctic Radwear cooling products from Radians. Arctic Radwear products accelerate the evaporative cooling process and provide welcome, and in some cases essential, relief from the heat. Safe and reusable, just soak the product in water then wear for several hours of cooling relief.

COOLING VEST

- Uses a unique 3-layer fabric system which absorbs, stores and releases water to keep your body temperature cool and safe
- Contains a waterproof & breathable inside membrane to minimize moisture transfer
- Adjustable stretch spandex waist
