

VendorPanel

The market leader in source-to-contract procurement

VendorPanel is a cloud procurement platform that helps organisations manage strategic and operational spend in one place.

In most organisations, people use email to get supplier quotes and are forced to manage the process manually. VendorPanel helps organisations get better value from their quote based purchasing. Bringing everything together in one online tool, organisations save money by ensuring competition, while reducing risk and ensuring staff are accessing the right suppliers.

Clients also leverage spend to support better business outcomes by engaging local and social impact suppliers, helping to deliver on broader organisational goals.

One integrated solution for:

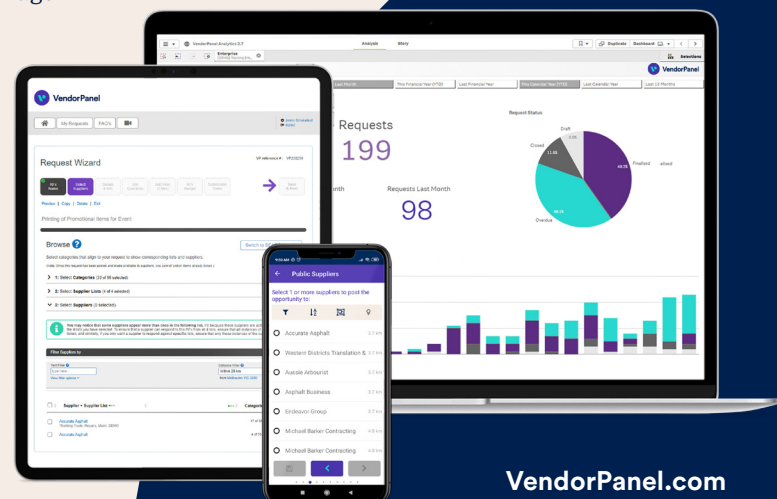

- Supplier management & discovery
- Sourcing, evaluation & award
- Contract management, reporting & analytics

VendorPanel offers:

- Easy to add and manage preferred suppliers and contractors
- Access to over 50,000 Marketplace suppliers
- Hassle-free implementation by dedicated, long-term, Success Managers
- High user adoption and world class platform design
- Rapid integration with existing systems, data and processes
- Secure, Australia-based hosting

Trusted by Corporates and Enterprise

For over ten years, we have been trusted by some of Australia's most respected businesses to transform how they manage strategic and operational procurement.
