FOR IMMEDIATE RELEASE  
Date: November 11, 2020

**Grace Technologies partners with TW Becker Electrical Safety Consulting to provide Expert Consulting Practice for compliant Electrical Safety Program implantation.**

DAVENPORT, Iowa—Grace Technologies, Inc. in association with Terry Becker, P.Eng., CEM, IEEE Senior Member of TW Becker Electrical Safety Consulting today announced a joint venture, fusing Grace’s decades of electrical safety product development with Mr. Becker’s decades of experience as an Electrical Engineer and electrical safety development training consultant. The Expert Network by Grace will endeavor to provide personalized solutions for facilities, big or small, to meet the criteria of a sound and compliant Electrical Safety Program.

In addition to Mr. Becker, Charles Miller is also onboard for the Expert Network. Mr. Miller is a master electrician, business owner, author, educator, and talk-show host. As an author and illustrator, he has an extensive list of electrical-related publications to his credit, including some published by the National Fire Protection Association (NFPA). Miller also sits on two NFPA committees, including the committee for the NFPA 70E standard.

As a leader in driving workplace productivity and safety through their innovative products and solutions for over two and half decades, the next logical step for Grace was venturing into an Expert Consulting Practice in the space of electrical safety, maintenance, and reliability. Through their expert network program, Grace envisions to provide tools, resources, training, and guidance to facility’s safety and maintenance teams to either enhance their current safety and maintenance programs, or to bring their programs to compliance as mandated by the regulatory codes and standards.

As part of this initial roll out, Grace will offer a well-defined and licensed Electrical Safety Program that includes a robust framework, questionnaires, forms, and templates that are in alignment with occupational health and safety management systems such as OSHA, ISO 45001, ANSI Z10, NFPA 70E, CSA Z462 standards. A team of well renowned consultants with extensive industry experience will be handpicked and matched to suit your unique needs.

The team of consultants will work with facility managers from the initial discovery process through program development and implementation. The team of consultants will also closely work with their EHS and electrical safety teams and walk through every step and detail in the process. Additionally, the

consultants will further help to customize the electrical safety program to specific facility needs while still aligning with the codes and standards.

#### **About Grace Technologies, Inc.**

Grace Technologies is making maintenance safer, smarter, and more productive with innovative electrical safety products and predictive maintenance solutions. The GracePort® product is the single most popular panel interface connection used in the industry today. With GracePESDs®, the product category of Permanent Electrical Safety Devices was pioneered by Grace. The new GraceSense™ product line of IIoT smart devices is a marriage of predictive maintenance technology and personnel safety techniques. Grace Technologies is a Rockwell Encompass partner with products available around the globe via a distribution network and sales presence in 60+ countries.

#### **About Terry Becker, P.Eng., CEMCP, IEEE Senior Member**

Terry Becker has over 28 years of experience as an Electrical Engineer, with 12 years specifically devoted to electrical safety. Terry is the First Past Vice-Chair of the CSA Z462 Workplace electrical safety Standard, a founding Voting Member from 2006. Terry is also a founding member and Voting Member of the CSA Z463 Maintenance of electrical systems Standard. Terry is a Voting Member on the IEEE 1584 Guide for Performing Arc-Flash Hazard Calculations Technical Committee. Terry has provided electrical safety consulting and arc flash and shock training across Canada in all industry sectors.

Terry delivers engaging presentations on electrical safety at industry conferences and workshops - he has been seen across Canada, in the USA, Australia, and India. Terry created ESPS Electrical Safety Program Solutions, Inc. in 2007 where he pioneered electrical safety consulting and arc flash and shock training both instructor led and e-Learning.

#### **About Charles R. Miller, NEC Expert, Master Electrician, Business Owner, Author, Educator**

Charles R. Miller is a master electrician, business owner, author, educator, and talk-show host. Based out of Lebanon, TN, Charles spent eighteen years as a successful business owner and electrical contractor. Since then, he has focused his time and energy on writing and teaching to promote knowledge and proficiency among engineers, electricians, and tradespeople in the field. As an author and illustrator, he has an extensive list of electrical-related publications to his credit, including some published by the National Fire Protection Association (NFPA). Miller also sits on two NFPA committees, including the committee for the NFPA 70E standard.

In 1988 he began to focus and dedicate himself to electrical-related training. Besides teaching his own custom-tailored classes and seminars covering various aspects of the electrical industry, Mr. Miller partners with some of the top electrical training organizations in the country. His list of achievements include teaching with the National Fire Protection Association (NFPA).
