Stainless Market Sees More of the Same

Tight supply continues in the stainless market with little relief in sight until later this year when ordered imports begin arriving to suppliers starved for domestic material. Though imports will likely result in slight increases in availability, service centers and manufacturers are already looking to lock in contracts for the first half of 2022.

Limited supply, coupled with elevated surcharges on all stainless types, are keeping prices up. The slight dip in nickel last month has recovered, but chrome remains the prime driver in surcharge pricing.

Aluminum Hits Three Year High

Aluminum continues its climb, most recently hitting a three year high. The upward trend has been driven by a number of factors:

- Strong global demand
- Trade constraints in both the U.S., related to anti-dumping duties in effect for China and 18 other countries, and the European Union, impacted by anti-dumping duties in place against China
- A weakening U.S. dollar
- Anticipated supply reductions and/or disruptions related to new environmental policies going into effect in China

Strong Since 1954

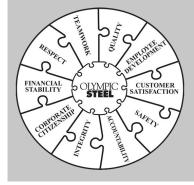

36+ facilities

4.1+ million square feet

324+ pieces of metal processing equipment

Our Values

Buy Smart. We Can Help.

As the stainless and aluminum markets continue to hit new highs and supply remains tight, getting the material you need and making the decision when to buy can be tough.

Let our knowledgeable team help with strategic sourcing. We've got the industry insights and the supplier relationships you need to make the smart buy.
