

TAYLOR LOGISTICS INC.

PPE DISTRIBUTION AND STORAGE

Dependable PPE Solutions

The COVID-19 Crisis has highlighted the importance of keeping preparedness supplies on hand for future emergencies. Taylor’s network allows us to reach 70% of healthcare providers in the United States within 24 hours from our 400,000 square feet of warehousing space.

Shipping Solutions That Fit Your Needs

Low Unit of Measure shipping (LUM) provides PPE customers with products in the lowest unit of measure—typically an “each.” This shipping method is for clients that want to decrease total supply chain costs by having orders picked and packed for a specific location.

Emergency Preparedness

Taylor recognizes its critical role in the healthcare supply chain during crises such as natural disasters and pandemics. To prepare for an emergency or disaster, our team will help to develop a plan for emergency orders, prepare surplus stock items, and determine pre-approval for substitutions for critical supplies and custom packaging and kitting

Full Suite Of Values Added Services Ready To Assist
