ALONG OPEN ROADS, WITHOUT OBSTACLES.

Kenco Bucket Trucks, known for our purple bucket truck transport services, was founded over two decades ago to serve the high load and oversize cargo transport market. Kenco's sole mission is to deliver safe, efficient transports for oversize cargo by handling aerial obstructions and roadside obstacles, providing route survey and planning services along the transport route and working with local authorities and utility companies to ensure that the transport route causes minimal disruptions for the community and cargo owner. We provide a team of highly trained, safety-conscious individuals to help ensure a snag-free route and cost-effective, on-time delivery of your cargo. Kenco's services are available anywhere in the lower 48. Remember Kenco when you have **HIGH LOADS** and you need **OPEN ROADS.**

OUR TOP PRIORITY

Kenco takes safety seriously and provides experienced, well trained, certified technicians and state-of-the-art equipment necessary for safe handling of all overhead obstructions. With more than 170,000 man-hours worked without a safety incident through the span of a year, our continuous training programs and commitment to safe operations are proven successful. Safe-transport protocols save time, reduce costs and help ensure your cargo arrives at its destination snag-free.

In addition, our bucket trucks are equipped with the latest tools and safety features and our booms and buckets are dielectrically tested annually to keep them operating at top performance.

Every member of our bucket truck escort team is required to undergo rigorous training and receives industry-specific certifications to ensure that all high load transport projects are completed safely.

We provide in-house, comprehensive training that includes:

- Safe and approved methods of handling aerial wires and communication cables
- Removal and re-installation of traffic signals and streetlights
- Removal and re-installation of road-side signs and overhead bridge signs

OUR CERTIFICATIONS & TRAINING

Kenco has a proprietary library of custom bucket truck videos and safety training for on-site and off-site hands-on bucket truck training, in addition to the following certification and training programs:

- OSHA Fall Protection Certification
- OSHA 30 Hour Training Course
- TRF450 and TRF453 Certifications
- Defensive Driving
- Distracted Driving
- Risk Tolerance
- IMSA Work Zone Safety Certification
- IMSA Traffic Signal Technician I Certification
- IMSA Traffic Signal Technician II Certification
- Texas DOT Certified Contractor
- HASC Training

OUR TRANSPORT SERVICES

Our goal is getting you and your cargo to its destination safely and on time. Our team of trained professionals are qualified to:

- Disconnect and remove aerial traffic signals
- Remove and/or raise signal mast arms
- Reposition signal mast heads for proper clearances
- Remove pedestrian cross walk signs
- Remove and replace over highway signage
- Adjust and lift communication cabling for proper clearances such as:
  - Telephone
  - Cable
  - Fiber
- Remove and replace any roadside signage such as:
  - Stop signs
  - Yield signs
  - No turn signs
  - Wrong way signs
  - School zone signs
  - Caution signs

Our team often works with local authorities to minimize disruptions to the communities affected by oversized transports. We also coordinate traffic management plans or intersection detour plans as needed. As proven leaders in the industry, our decades of experience enable us to help plan routes quickly that allow you to keep your cargo moving.
