

VIGON[®] NX 700

————— NEXT GEN pH NEUTRAL CLEANING

10 years ago, ZESTRON revolutionized PCB cleaning with the first pH Neutral product of it's kind.

TODAY, THE REVOLUTION CONTINUES.

ZESTRON
High Precision Cleaning

THE NEXT GENERATION OF pH NEUTRAL CLEANING IS HERE

VIGON® NX 700

VIGON® NX 700, based on MPC® (Micro Phase Cleaning) Technology, is designed to be used in inline and batch cleaning systems. VIGON® NX 700 is a pH neutral cleaning agent offering superior defluxing performance on PCB assemblies especially under low profile components. The cleaning agent removes a wide range of electronic assembly flux residues and offers excellent material compatibility on a variety of sensitive materials. VIGON® NX 700 qualifies as a Low VOC product with applied VOC concentrations below 25 g/L.

SUPERIOR CLEANING PERFORMANCE

Excels at targeting low-standoff components, especially with newer generations of solder pastes and fluxes.

pH NEUTRAL CLEANING

Excellent material compatibility with sensitive materials, coatings and labels.

GREATER PROCESS EFFICIENCY

Exceptional cleaning attainable with increased throughput.
Performs well at low application concentrations in specific processes.
Easily rinsed yielding a wide process window.

ECO-FRIENDLY

Exceptionally low VOC (as concentrate) meeting latest SCAQMD and OTC regulations.
Low phosphorous content.
Eco-friendly formulation eliminates the need for waste water neutralization.
Halogen-free, contains no CFCs and HAPs.

THE
REVOLUTION
CONTINUES
