

Increase the impact of institutional research

The office of research plays a key role in improving the impact of research activities. Yet too often, lack of visibility into research output, manual workflows, and partial metrics harm overall effectiveness.

With Ex Libris Esploro, you can:

- ✓ Showcase all research outputs & data, across all disciplines
- ✓ Reduce the burden on researchers with auto-generated profiles & deposit workflows
- ✓ Understand what is published and by whom and easily produce activity reports
- ✓ Improve compliance with open access policies
- ✓ Get benchmarks across researcher, faculty and institution
