

Leganto: Course Resource Lists Made Easy

Ex Libris Leganto enables you to easily create, manage, and share course resource lists that engage students and foster meaningful learning, while saving you time and effort.

Leganto becomes your academic partner, helping you build structured, comprehensive resource lists that include materials of all types—physical books, online or digitized book chapters, scholarly articles, videos, newspaper articles, websites, open access resources, and any other type of material. You can build a resource list by yourself or collaborate with others, such as colleagues, assistants, or librarians. Leganto connects to your course management systems seamlessly and makes it simple for students to access all of the materials from one place.

Games of History: Games and Gaming as Historical Sources

The course offers an introduction to historical theory, the use of sources in History, and games and gaming as sources for the study of cultural, social, and political history. Historical cases of games and gaming are used to approach and reflect upon social, political, and cultural history. The implementation of theories will be based on games-and-gaming-cases from various periods and civilizations, with a special focus on European culture.

Top 5 reasons for using Leganto

Seamlessly Integrated with Your LMS

Instructors and students can access course resources directly from the institution's learning management system, without authentication barriers.

Easy to Create & Modify Lists

Search the library collection, add from web content and upload your own files. Organize and annotate for structure & context.

Connect with Students

See what materials students engage with and, if you like, enable discussions and let them suggest additional content.

Library Support & Collaboration

Make materials available to students at no or low cost and ensure that there are no access restrictions or broken links.

Next Term? Ready to Go!

Create your list now, then easily duplicate it next term making any adjustments you like.

Comprehensive Content

- Find any physical or electronic resource that your library offers and add it directly to your list.
- Easily add items from external resources such as scholarly databases, publishers' websites, online bookstores, YouTube, and other third-party platforms.
- Import files, citations and references from Reference Management tools.
- Explore other relevant materials through automated recommendations of related content.

Easy to Build, Easy to Use

- Add, remove, revise or reorder resources at any time, even during the semester.
- Use drag-and-drop to add or rearrange materials.
- Label or add notes to items, sections and citations.
- Communicate directly with the library through the Leganto interface.
- Export your resource list in multiple citation formats.

Engaging and Insightful

- See the metrics on student views per item.
- Engage students through item-specific comment threads and "likes".
- Encourage students to discuss and suggest additional resources publicly or privately.
- Availability information is always updated.
- Lists are accessible online, from any device.

The library handles copyright clearance, course reserves, and anything else needed to make all items available to your students. And Leganto's integration with learning management systems means that your students can seamlessly access resource lists.
