### Key Components

Shared holding index

Library definitions and pods

Patron focused experience

Automated flows

Document delivery via RapidILL

- A global index of all library holdings – allows Rapido to find a lender with resource needed
- The Rapido pods allows libraries to choose who they want to share resource with and in what terms
- The Rapido automation makes most part of the process unmediated (well we still needed a librarian to go to the shelf and get the book...)

### How does this work?

Primo provides simple, one-stop searching for books and e-books, videos, articles, digital media, and more.

Primo also helps you manage your research. Sign-in in order to:

- Renew books and videos
- Create favorites lists
- Export citations to Refworks and Endnote Web
- View full search results. (Some databases, only show results when you're signed in.)

**Keep Up With Alma**

**Easier to update a large number of items**  
 Instead of updating each item separately you have two new improved ways to do bulk updates: Bulk operation on list of items or using the improved Metadata Import for external sources of item information. When using the physical item search you are able to perform bulk operations on multiple items. Also via the Metadata Import you can update more fields of multiple items in an easier manner. See more information here and videos on Manage Selected Physical Items and Additional Fields for Inventory Import

See more exciting new features!  
 Share your great ideas with us and help us improve Alma!
