

# Returning to campus with Ex Libris campusM

Supporting students, staff and faculty, on and off campus

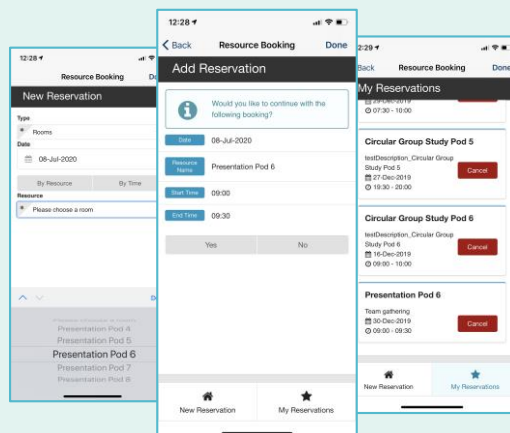

Higher education institutions are facing uncertain times as they come to terms with the consequences of the COVID-19 pandemic. As campuses begin to re-open and adapt to the “new normal”, it is essential to ensure students, staff and faculty feel safe, informed and well supported.

Ex Libris campusM enables institutions to communicate broad and targeted messages, services and updates in a consistent and engaging way so they feel informed and reassured.

Our cross-platform approach allows users to access academic, social and COVID-19 related services on the device of their choice, wherever and whenever they want to.

With features such as attendance capture, quick polls, resource booking, and capacity tracing, campusM gives you the tools you need to help make the return to campus as smooth and safe as possible.

# Key Features

## Class Attendance:

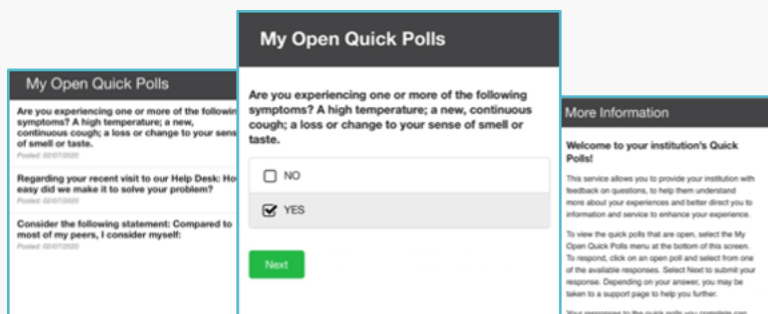

- ✔ No hardware requirement so attendance data can be captured on, or off, campus
- ✔ In depth analytics gives you valuable insight into levels of student engagement
- ✔ Absence reporting makes it easy to see where local outbreaks may be

## Quick Polls:

- ✔ Gain insight into student sentiment with single question, multiple choice polls
- ✔ Quick and easy to configure through web administration tool
- ✔ Provides valuable information to help you deliver targeted services and support

## Resource Booking:

- ✔ Allow users to easily book resources such as laptops and study space
- ✔ Administrators can adjust staffing levels to adhere to social distancing guidance
- ✔ Users are reassured that the resource will be available to limit time on campus
