

# WORKWEAR FOR HEALTHCARE

ANY WORK,  
ANYWHERE

Extensive shifts of medical and health professionals increase the demand for medical care uniforms. We provide a wide portfolio of high-quality workwear fabrics, suitable for hospitals, nurseries and doctor practices. From polyester/cotton to 100% sustainable solutions.

## TenCate Protective Fabrics' workwear fabrics for healthcare combine strength with comfort and style

Professionals around the world evolving in the most demanding working environments have long trusted TenCate Protective Fabrics' workwear fabrics for its unique combination of comfort, strength and protection. While end users also appreciate our fabrics for their renown long lasting looks that contribute to safeguard their corporate image, garment makers and industrial laundries value their durability and colour performance to repeated launderings.

## FABRICS FOR HEALTHCARE WORKWEAR

### TECAWORK™

### POLY-COTTON AND COTTON-RICH FABRICS

#### LIGHTWEIGHT & COMFORTABLE

Provides a greater wearer comfort thanks to its breathability and lightweight.

#### STRONG & DURABLE

Truly fitted for hard working environments thanks to greater tear and abrasion resistance features which will allow a longer garment life cycle.

#### INDUSTRIAL LAUNDERING

Engineered to retain its looks even after high temperature industrial laundering.

#### SECURITY OF SUPPLY

The majority of its supply chain is conducted locally/regionally and will not be affected by international circumstances. Because of its reusable character, its availability will continue to be there and stock levels are at ease.

### TECAWORK™ Ecogreen

### SUSTAINABLE FABRICS

#### 100% GREEN FIBERS

Manufactured from 100% TENCEL™ Lyocell fibers from sustainably sourced wood and 100% mechanically recycled polyester from PET bottles.

#### ULTIMATE WEARING EXPERIENCE

The fabric's high TENCEL™ Lyocell content provides an unparalleled softness and an excellent moisture management control.

#### STRONG WITH LONG-LASTING LOOKS

High mechanical properties and excellent colour retention capabilities, even after repeated industrial laundering.

#### SECURITY OF SUPPLY

The majority of its supply chain is conducted locally/regionally and will not be affected by international circumstances. Because of its reusable character, its availability will continue to be there and stock levels are at ease.
