What is Telesystem MS Teams Direct Routing?

To help businesses take full advantage of their existing Microsoft Teams client and all the collaboration features it offers, Telesystem has combined the strengths of its enterprise voice capabilities with Microsoft Teams via Microsoft Direct Route. This powerful combination allows businesses to combine Microsoft Teams with our VoIP platform into a single solution from a single solution provider.

Telesystem connects Microsoft Teams to the public switched telephone network (PSTN) using Direct Routing over our secure voice network allowing users to make and receive telephone calls external to their organization right from Teams. MS Teams Direct Routing provides full voice capability, including call transfer, forwarding and voicemail. Telesystem provides DID/DDI number porting and management nationwide, allowing users to retain their existing telephone numbers.

Guaranteed Savings

Cut your monthly phone bill between 20%-50% and eliminate capital expenditures and maintenance costs on your existing phone system, plus unlimited minutes to US and Canada.

Flexible Mobility

Connect your normal desktop phone to the Microsoft system which allows for greater flexibility to transfer and handle calls as well as mobility to work at the office, at home, or on the go, from any device, on a single platform.

Enhanced Features

Advanced call queuing allows you to field calls based on predefined business rules, wait time, or customer value. Monitor queue status and advanced features such as Whisper, Interactive Voice Response (IVR) and Automatic Call Distributor (ACD) to expand the capabilities and productivity of your team.

Increased Reliability

Utilize Telesystem's Geo-Redundant switch platform with 99.999% uptime and high definition sound clarity.

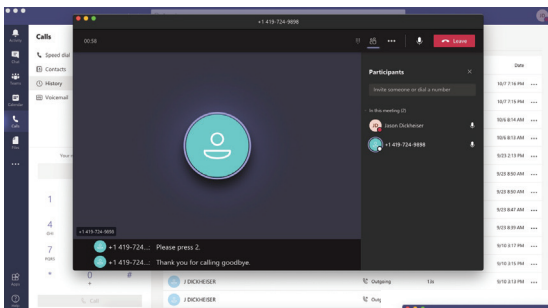

Telesystem MS Teams Voice Configuration Capabilities:

1. Our Voice Core provides enhanced PBX functionality and connectivity to the PSTN to MS Teams clients via a direct route to Microsoft Cloud.
2. Integrate MS Teams to provide a seamless user experience for users via the Microsoft Teams soft client, desk phone, or mobile application.
3. We can provide SIP trunking to MS Team via Direct Route through our voice core without deploying any additional equipment for a faster delivery of services.

Telesystem SIP Trunking + MS Teams =

<p>Ease of operation</p>	<p>With Microsoft Direct Routing, you benefit from all of the features your business needs, such as multi-level auto-attendants, advanced hunt groups, call reporting, and e911. With configurations that your O365 admin will retain complete control over.</p>
