

Fully managed solution for K-12, Universities & Libraries

Provide anytime, anywhere access without compromising network and student security. Telesystem's Managed WiFi seamlessly integrates to deliver a scalable enterprise-class solution that will support your organization's current and future technology requirements. With Telesystem's Managed WiFi, you can offer your students and guests the fast, open WiFi access they expect - along with the private wireless access you and your faculty needs to run your institution securely and efficiently.

Telesystem designs, configures, installs, monitors and manages your secure wireless network freeing you from the burden and cost of setting up and managing a wireless network, and allowing you to focus more on your business needs. Our complete end-to-end WiFi service includes all necessary indoor and outdoor access points (APs), switches, and peripherals, as well as assessment, design, cabling, installation, engineering, hosted management, and post-installation maintenance and updates. Our solution is managed remotely, providing 24x7x365 monitoring and maintenance of firewall, switches and Access Points (APs) to ensure full coverage and complete connectivity as well as maintaining network components with up-to-date firmware and patches.

Benefits of Telesystem Managed WiFi

- **Management** - Freedom from having to employ and monitor on premise in-house support for the constant maintenance of the wireless networks.
- **Savings** - Telesystem handles support and equipment replacement costs, plus you can leverage eRate discounts on our Managed WiFi solution.
- **Security** - Full HIPAA compliant WiFi access.
- **Scalability** - Quickly add or subtract equipment to meet demand.
- **Reliability** - Proactive, preemptive monitoring assures minimal downtime due to outages. 24x7x365 technical support.
- **Affordability** - The end-to-end Managed solution avoids additional installation, replacement hardware, and upgrade costs offering a shift from capital expenditure demands to operational investments.
- **Private WiFi** - Restrict access to unauthorized users. Set up password protected WiFi for your staff or students with your own network name and security levels. Customize the splash page with your school logo and usage information.
- **Guest WiFi** - Separate, secure WiFi network for visitors and guests. Customize the splash page with your school logo and usage information.
- **Custom Splash Page** - The splash page can be completely customized with your own colors, logo, images, sign on options and message (additional cost for Telesystem to design it for you).

- Provide completely **secure** and fully managed guest WiFi access when hosting school and sporting events.
- **Password Protection** by way of login for Multiple Guest and Private SSIDs.
- **Affordable**, scalable guest internet access independent from your main network.
- 24x7 proactive **monitoring** and technical support.
- Supply students and faculty with the **seamless mobility** of ubiquitous WiFi access from any point on campus, indoors or out.
- Customizable **Bandwidth Allocation** distinguishes limits. For example, between students and guests.
- Added savings by leveraging **e-Rate** funding and discounts.
- Create collaborative group settings and utilize **cloud-based learning**.
- **Customizable URL landing page.** Add your own logo and usage instructions.
