Managed Firewall

MONITOR. DEFEND. SECURE.

Protect your business with reliable, scalable, multi-point security from Telesystem.

TLS Inspection

Industry-leading performance and visibility into all the encrypted traffic on your network with support for TLS 1.3.

DPI Engine

High-performance deep packet protection in a single streaming engine for stopping all known and uknown threats.

Web Filtering

AI-driven web filtering service provide comprehensive threat protection to address threats including ransomware, credential-theft, phishing, and other web-borne attacks.

Telesystem Managed Security - Firewall

Telesystem Managed Firewall provides a fast and secure solution for any size business. Protect against cyber threats with system-on-a-chip acceleration and industry-leading secure SD-WAN in a simple, affordable, and easy to deploy solution. Telesystem's Security-Driven Networking approach provides tight integration of the network to the new generation of security.

Key Advantages

Performance

Telesystem Managed Firewall delivers the industry's best threat protection performance and ultra-low latency using purpose-built security processor (SPU) technology. It provides industry-leading performance and protection for SSL encrypted traffic. High-density, flexible combination of various high-speed interfaces enable best total cost of ownership for data center and WAN deployments.

Next Generation Firewall (NGFW)

Reduce complexity and maximize your ROI by integrating threat protection security capabilities into a single high-performance network security appliance powered by the industry leading Security Processing Unit (SPU). Protect against network exploitable vulnerabilities with industry validated IPS that offers low latency and optimized network performance. Automatically detect and block threats on decrypted traffic using the industry's highest SSL inspection performance, including the latest TLS 1.3 standard with mandated ciphers. Proactively block newly discovered sophisticated attacks in real-time with AI-powered advanced threat protection services.

Features

- Intrusion Prevention System (IPS)
- Advanced Malware Protection
- Application Control
- Web & Video Filtering
- Antispam
- Security Rating

Telesystem Managed Firewall delivers the industry's fastest application identification and steering for efficient business operations and accelerates IPsec VPN performance for best user experience on direct internet access. Enable best of breed NGFW Security and Deep SSL Inspection with high performance, all setup and managed by Telesystem Professionals.
