

Managed Security

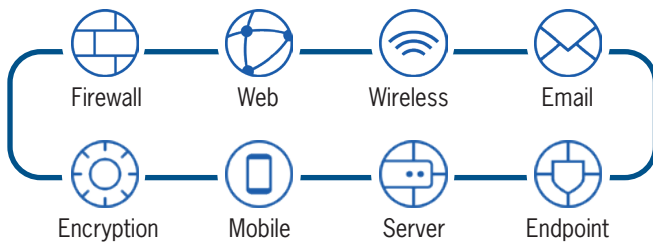

Equipping your business with Telesystem's DDoS Protected Network and Managed Security gives you the protection of a comprehensive, purpose-built security system you simply can't get anywhere else.

Distributed Denial of Service (DDoS) attacks are major threats to your network. As your front line of defense, Telesystem defends against phishing scams, ransomware, malware, cyber threats and other harmful traffic at our core. Once these harmful files are intercepted and isolated, your files are then reverted back to a safe state.

Telesystem DDoS Protected Network

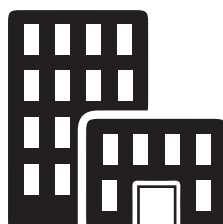

Telesystem's advanced threat protection is capable of inspecting, detecting and defending in real-time, protecting your resources from malicious DDoS attacks. Backed by industry leading threat intelligence, businesses can be confident that our defense system is proactively improving your security.

Protected Network with Telesystem Managed Security

Telesystem's Managed Security provides the ultimate defense against advanced threats. Our unified threat management system provides content filtering, intrusion detection, data loss prevention, anti-virus and anti-Spam by isolating and removing the threat.
