

Video Conferencing

CONNECT. COMMUNICATE. COLLABORATE.

With a single click, Telesystem's Video Conferencing solution allows you to conduct face-to-face meetings, chat, share your screen, applications, and whiteboard with anyone, anytime, anywhere.

It's time to boost collaboration + productivity

Gain a Collaborative Workforce

- Workers stay in touch with each other, partners, and customers regardless of location.
- Real-time collaboration ensures easy, ongoing sharing of ideas and information.
- Distributed teams solve problems faster and create stronger relationships when they are connected, which translated to improved business outcomes.

Reduce Costs and Improve Productivity

- Significant cost savings with reduced travel expenses and non-productive travel time.
- Improve access to the resources employees need to get their jobs done.

Robust Features, Right-sized

- Choose from meeting room sizes of 4, 10, 25, 100, 200, 300, 500 participants.

Layer on additional webinar capabilities for 100, 500, 1000 participants. Webinar hosts enjoy additional features that include presentation-only mode, Q&A, polls, and attendee registration.

Why choose Telesystem Video Conferencing?

- **Simplify Your IT** - Utilize a cloud-based video and collaboration service with no equipment to deploy or manage
- **Unify Your Team** - Enable users to collaborate however they want: with video, chat, and screen/file sharing from wherever they happen to be working
- **Meetings on the Go** - Join meetings from any device - Desktop, iOS, Android with a single click
- **Increase Engagement** - Share documents, chat, screen share, white-board and more
- **Record + Share** - Meeting organizers can store a complete permanent record of a conference
- **Ease of Use** - Single click start. Users who don't have the application can simply click a link to join
- **Simple Integrations** - Schedule future meetings using Outlook Plug-in
- **Webinar Capabilities** - Layer on additional webinar capabilities for 100, 500, or 1000 participants
