

NOW.

5 picks from the Hysolate team that
you should read NOW

Hi there,

When we shifted to Work from Home, a lot of IT leaders thought they'd have to totally reinvent their infrastructure.

The options for managing this shift are... imperfect to say the least. VDI and DaaS have known UX issues and simply using a VPN doesn't provide the level of security enterprises need.

OS isolation puts an end to the trade off between user experience and security by giving employees a VM based workstation on their device.

Read Hysolate CEO Marc Gaffan's recent article in HelpNet security to learn more about the false choice between worker productivity and security.
