Executive Summary

Thank you for your interest in DefendX Software Data Collection Agent[™] for NAS, EMC® Isilon Edition. DefendX Software Data Collection Agent for NAS, EMC® Isilon Edition is a critical component of an overall file data management (FDM) architecture and is part of the DefendX Software® integrated suite of products. Together, these products are designed to help organizations control and report on their current and ever-growing storage infrastructure.

This document is a guide to the successful installation of DefendX Software Data Collection Agent for NAS, EMC® Isilon Edition. It will take you about 15 minutes to complete the installation steps provided here.

Before You Begin

The hardware required to support DefendX Software Data Collection Agent for NAS, EMC® Isilon Edition should be appropriate for the services running on the machine. For more specific hardware information, review the *Requirements* section of this document.

DefendX Software recommends using a single service account for installing DefendX Software Data Collection Agent for NAS, EMC® Isilon Edition. This account requires local administrator rights on each machine where DefendX Software Data Collection Agent for NAS, EMC® Isilon Edition is installed.

Requirements

Hardware Specification

Each DefendX Software Data Collection Agent for NAS, EMC® Isilon Edition server must meet the following minimum requirements prior to installation:

- 2.2 GHZ CPU
- 4 GB RAM
- 20 MB free disk space

Each agent requires 20 MB for installation files and additional disk space for scan caching. The amount of disk space required for scan caching scales depending on the amount of disk space that the agent is configured to scan. DefendX Software recommends reserving 1 GB of additional disk space for this scan caching.

Software Specification

Each agent server must be running:

 Windows Server® 2008, Windows Server® 2008 R2, Windows Server® 2012, or Windows® XP with administrator privileges.

Installation

Prior to installing DefendX Software Data Collection Agent for NAS, EMC® Isilon Edition. DefendX Software recommends verifying that the installation server meets the requirements listed in the *Requirements* section of this document.

Installing Data Collection Agent for NAS, EMC[®] Isilon Edition

- 1. Log on to your Windows Server 2008, Windows Server 2008 R2, or Windows XP machine using an account with administrator privileges.
- 2. Launch the Setup.exe file
- 3. When the **Welcome** dialog box appears, click **Next**.

4. In the License Agreement dialog box, read the end-user license agreement. If you agree to the terms, select I accept the terms of the license agreement and then click Next. If you do not accept the terms, click Cancel to exit the installation.
