

Provider Checklist-Outpatient -Imaging

Checklist: Magnetic Resonance Cholangiopancreatography (MRCP) (For CPT codes: 74181, 74182, 74183)

Indicate if failed diagnostic ERCP (Endoscopic Retrograde Cholangiopancreatography)

Indicate if suspected cancer of ampulla/CBD (Common Bile Duct) /pancreas by CT/US

If dilated CBD by US/CT, indicate abdominal pain by Hx **OR** direct bilirubin > normal

If pancreatitis \geq 2x w/in last yr, stipulating not alcohol related by Hx **AND** US normal/
nondiagnostic for etiology of pancreatitis

If suspected pancreatic duct disruption after trauma, include findings with amylase/lipase **AND**
peritoneal lavage amylase results **AND** pancreatic injury by CT/US

Indicate if suspected bile duct injury post cholecystectomy

If moderate suspicion for CBD stone/obstruction, indicate dilated CBD by US/CT **AND** findings
of pre- **AND** post-cholecystectomy

If suspected biliary stricture after liver transplant, indicate abdominal pain by Hx **OR** direct
bilirubin results

Indicate if intraductal papillary mucinous tumor by US/CT

Indicate if suspected choledochoceles/choledochal cyst by US/CT
