

Managed IT

Optimized at Every Level.

More than simply a technology provider, we're problem solvers. Whether you need a completely new network or simply an improvement, our team can help. The word "partner" is used a lot these days, but we truly partner with our clients, putting relationships over transactions. When you optimize the way your business uses technology by collaborating with hands-on experts, the sky's the limit. BT Partners consultants are deeply invested, offering the practical expertise and seamless support your business needs to be successful.

Systems Monitoring

We proactively implement solutions to improve performance and constantly monitor all critical network components to detect and resolve potential threats faster.

Security

We proactively maintain your systems by leveraging the latest cybersecurity tools to keep your data secure, whether it's on your servers or in the cloud.

Server / Desktop Support

From single PC installation to group-wide software updating, we optimize your technology - improving reliability while ensuring an enjoyable user experience.

Virtualization / Cloud

We help you increase IT agility, flexibility, and scalability while creating significant cost savings by constantly looking for emerging tech to give you a competitive advantage.

IT System Assessment

A detailed engagement analyzing your system for vulnerabilities, including security, patches, documentation, processes, and best practices.

Back-up / Disaster Recovery

Our Back-Up/Disaster Recovery (BDR) solutions can reduce your downtime from hours to minutes, ensuring critical applications are always available to you.
