

introducing temi

the personal robot, helping your community

protect. connect. engage.

during the COVID-19 pandemic & beyond.

The world-leading video-oriented robot interacts with humans while providing flawless autonomous navigation, dynamic video, audio experiences and advanced AI.

For Senior Living Communities, temi empowers;

- family and doctor video visits
- interaction with Alexa Skills
- wellness checks
- companionship
- coming soon - temperature checks

"We are committed to continuously innovating the way we do things, and bringing the best of what the market has to offer to our residents. While this has always been our commitment, being able to deliver social and emotional visits with family, and/or connect with a doctor in the resident's room is critical at this time."

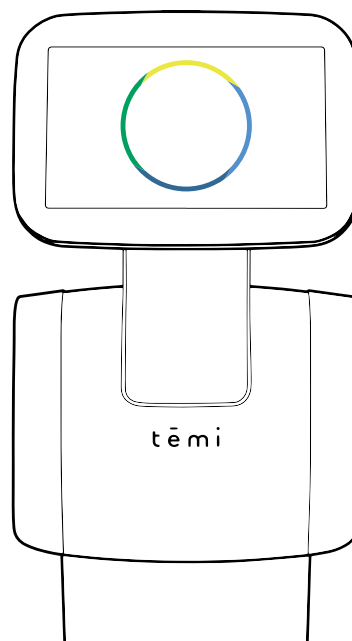

~ Eleonora Tornatore-Mikesh,

Chief Experience & Memory Care Officer of Maplewood Senior Living

BUILT IN Connected Living Experience Right Out of the Box

Incorporate your community information into interactions with temi! Register the Connected Living proprietary Alexa Skill that will share your community's menus, events, announcements, and more when Alexa is invoked.
