

Instructions

Patients Using CryptoChart

Viewing your images

1. Access your images by scanning the QR code below using your mobile device. (Apple devices have a built-in QR code reader in the camera app. For Android devices, you may need to download a QR code reader app. We recommend Google Lens)
2. Click on the link that appears on your screen.
3. Click on VIEW MY IMAGES

Sharing your images with your healthcare provider during a visit

1. Ask your healthcare provider to visit nv.novarad.net.
2. Access your images (see steps 1 and 2 above) and click SEND ACCESS CODE.
3. Instruct your healthcare provider to enter the code on nv.novarad.net where prompted and then click VIEW IMAGES. The code is valid for 3 minutes, after which time you'll need to provide the next code that is automatically generated on your device.

You can also share your images by email or text (not HIPAA compliant):

1. Access your images and then click SHARE IMAGES.
2. Copy and paste the provided link into an email or text message and send. (Android devices automatically copy the link to the clipboard when "Share Images" is selected.)

HealthCare Providers Using CryptoChart

Receiving a code from your patient

If you have a QR code scanner: Open a Chrome or IE web browser and put your cursor into the URL bar. Scan the QR code above and click on VIEW IMAGES.

If you don't have a QR code scanner: Visit nv.novarad.net and enter the Doctor Access Code provided. Click on VIEW MY IMAGES. You must enter the code before the expiration date provided or request a new code from your patient.

Receiving a code from another healthcare provider or facility

If you have a QR scanner: Scan the QR code above and click VIEW IMAGES. From the desktop you can download the images into a Raw DICOM format for ingestion into your PACS system. You cannot download DICOM from the mobile version.

If you do not have a scanner: Go to nv.novarad.net and enter the Doctor Access Code before the expiration date.
