Junior Wordpress Designer/Developer

CODAworx is the hub of the commissioned art economy. We connect all members of the industry, matching creative talent with opportunities and providing digital tools that streamline the commission workflow process. Our network connects artists and creative teams to architects, design and art professionals, and the universe of companies that provide services and products for commissioned projects. The CODAworx website has attracted design + art members from 93 countries. To date, over 8,000 projects are featured on CODAworx with art budgets totaling over $1.5 billion.

We are seeking a part-time (25% - 50%), contracted WordPress Designer/Developer to augment our development team during a time of rapid expansion. This position will be responsible for developing, maintaining, and enhancing the core web platform for our website and requires a WordPress expert who is proficient in web development and comfortable with back-end technology.

Responsibilities & Qualifications

Front-End Web Development and Publishing:
- Create technical specifications and develop responsive designs using PHP, JavaScript, jQuery, HTML5, and CSS3.
- Recommend custom WordPress themes, plug-ins and widgets to meet business requirements.
- Conduct cross-browser and cross-device testing to ensure consistent display.
- Manage a version-control system such as Git.
- Research and implement best practices for web performance, scalability, and accessibility.
- Execute content updates across the core platform.
- Ensure consistency of brand standards across multiple platforms.
- Knowledge of SEO best practices and experience with tools such as Google Analytics and Google Tag Manager

Back-End Web Development:
- Integrate data from various services and databases and manage integrations.
- Ensure consistency of data across multiple platforms including WordPress, Hubspot CRM, Attendify, Algolia and Recurly.

Core qualifications:

- 3 - 5 plus years of experience in front-end and back-end development.
- Advanced understanding of the Wordpress CMS including: custom themes, custom plugins, and framework methodologies.
- Knowledge of JavaScript, React, Node.JS, MySQL and PHP.
- Experience working with cloud native architecture such as AWS or Azure.
- Strong organizational skills to juggle multiple tasks and shifting priorities within the constraints of timelines and budgets.
- Familiarity with modern development workflow and project management, including Sketch, Figma, InVision, Git, Basecamp and JIRA.
- Experience working in an Agile environment.
- Excellent communication and documentation skills.

Bonus qualifications:

- Design experience and ability to take ideas from wireframe through prototyping to deployment.

Information

Interested applicants should send the following information to Lee Wilson-Hayes, lee@codaworx.com - www.codaworx.com

- A portfolio, preferably online
- Your resume and/or LinkedIn profile
- A 1-2 paragraph summary of your favorite project from any of your work or personal experiences
