

Web & Mobile Insurance App Development

Case Study

About Client

Our client is a leading flood coverage organization in the United States serving through federal insurance with National Flood Insurance Program (NFIP) policies to protect homes, business or property from catastrophic loss.

Implementation Scope

We helped our client develop a web and mobile application to manage and adjust claims, approve settlements, and other necessary business integrations. The app is now being leveraged by field agents to capture evidence, media, and other important details.

Application's Key Features

- Claim Evidence Collection
- Media/Photos Capture
- Approval & Notification Workflow
- Centralized User Administration
- Reports Collection
- Advance Payment Request
- Final Claim Report Generation
- Integrations
 - Insuring for Master Data Systems
 - Vendors IT Systems

Architectural Decisions

- Used Micro-services architecture.
- Supports Multi-tenancy DB.
- Online/Offline Solution.
- Amazon S3 for document storage.

Technology Stack

- Angular, Java, J2ee, Spring Boot, Spring Cloud, React Native
- POSTGRES, SQLite (Mobile)
- Jenkins, Git, Dockers, GitLab for CI/CD, Tomcat
- AWS

About Us

Evoke Technologies is an innovative information technology services firm offering world-class software solutions. We are a client-centric and relationship-based company with a focus to provide cost-effective software development and support solutions.
