Welcome to The Campbell Clinic

Colin and the team would like to welcome you to The Campbell Clinic in Nottingham.

First and foremost, we are a dental practice that provides exceptional levels of clinical care and customer service. We pride ourselves on our ability to deliver excellent communication and get to the root of any patient problem. We also have a large team of dental specialists, general dentists and highly-trained team members who are able to assist with almost any dental problem quickly and comfortably.

The main philosophy of the practice is to treat our patients 'as a member of our own family' giving them plenty of time to achieve the results that they want and delivering them the smile that they deserve.

We achieve this with exceptional dental surroundings, state-of-the-art equipment and a highly-trained dental team.

It would be a pleasure to welcome you to The Campbell Clinic.

Our Facility:

The Campbell Clinic has recently relocated to our brand new, purpose built facility which is located in the Edwalton Business Park. The building is bright and spacious, creating a welcoming and comfortable environment for all of our patients.

Some of the features we have here at the Clinic that allow us to provide exceptional dentistry within an environment such as the one created by Covid-19 are:

- We have 47 patient car parking spaces (including disabled spaces and 1 electrical car charging point).
- Our front door is entirely automatic.
- Our toilets are designed with no touch features (apart from the door handles which are stainless steel for ultimate cleaning).
- Our waiting room allows for patients (and their escorts) to sit socially distanced in an open atrium environment which is not enclosed.
- Our six treatment rooms provide state-of-the-art cross infection ability with minimum flat spaces for easy cleaning and are airy and bright to provide excellent air flow.
- One of the main significant features of the clinic is the air-recycling systems in all clinical areas which allows the air within a room to be recycled up to 10 times per hour (2.5 times for every 15 minutes) which removes a significant amount of aerosol and air which is thought to provide enhanced patient safety.
- Our cross-infection facilities at the clinic are state-of-the-art and are kept entirely 'back of the shop' for complete patient safety.

The Campbell Clinic exists to positively improve the lives of as many people as possible through the work that we do and the example we set.

The Campbell Clinic pricing structure

At The Campbell Clinic, we exist to positively improve the lives of as many people as possible through the work that we do and the example that we set. It has therefore always been our plan to increase our accessibility and availability to patients in our new facility and we have reviewed and altered our price structure system (a project which was well underway before COVID-19) to include three levels of treatment for dental implant patients.

Our team are on hand to discuss all levels of treatment with any potential dental implant patient whether you are seeking expert specialist care for 10-year guarantees, wonderful clinician care for 5-year guarantees or affordable implant dentistry provided in a teaching environment.

Dental Implant treatment

If you have lost a single tooth or multiple teeth, then dental implants are often the best solution to replace them.

A dental implant is a titanium screw that is placed in your jaw and fitted with a prosthetic tooth. The results look and feel natural, restoring the strength and function of a natural tooth.

Dental implants are an option for most people and almost undetectable once they have been fitted. They can give the best results in terms of aesthetics and function, restoring the appearance of your smile or your bite.

Dental implant treatment is a very individual treatment option. Patients must be assessed thoroughly by experienced clinicians to see whether it is the best solution to their problems or needs.

At The Campbell Clinic we have decades of experience with individual clinicians placing over 10,000 implants combined. We have the ability to examine and diagnose patients at the highest possible level and to communicate and discuss with them whether or not dental implants would be their best option.

We also have the ability to offer all other options for the replacement of missing teeth should they be more appropriate.

Why The Campbell Clinic?

The Campbell Clinic is a place for patients who genuinely care about the health of their teeth and mouth and who wish for these to be looked after by the best possible individuals, using the best equipment available and with enough time to listen to their concerns and treat them on a personal basis.

In a world where everything seems to be done as fast as possible with minimum human contact, all of us at The Campbell Clinic try to be the opposite of that. We're keen to listen to patients' stories, to hear their concerns and wishes and are able to offer high-quality alternatives.

We aim to provide the type of healthcare that we would like to receive as patients and believe that this is the reason that the practice has been so successful and receives so many word-of-mouth recommendations.

- ✓ 100 years' combined implant experience
- ✓ Exceptional levels of clinical care
- ✓ Team of specialists & highly-skilled clinicians
- ✓ 'Member of our own family' philosophy

The Campbell Clinic Dental Implant Treatment Benefits

The benefits of undertaking all levels of dental implant treatment at The Campbell Clinic are:

- Guarantees provided for all levels of treatment.
- Straumann dental implants used for all cases.
- Specialist led Clinic with huge experience including 1000's of implant cases.
- A brand new, state-of-the-art facility that is designed to allow us to provide safe and controlled dentistry in an environment such as the one created by COVID-19.

The Campbell Clinic Guarantee

The Campbell Clinic dental implant fixtures are guaranteed from the date of surgical placement and implant retained crowns from the date of crown placement, for the appropriate time based on the level of treatment selected by the patient.

Please refer to the individual levels of treatment for further details and please do not hesitate to contact if you have any additional questions.

Level 1 Treatment:

Level 1 dental implant treatment at The Campbell Clinic is carried out by the senior clinicians at the practice who are either expert or specialist level and have been involved in 1000's of implant cases. This attracts a 10-year guarantee for patients that undergo the recommended maintenance using the best Straumann dental implant components including bespoke components and technical support for patients at this level.

This is the highest level of care that we can provide at The Campbell Clinic and our Clinicians work within a Multi-Disciplinary Team structure where they have access to other experts and specialists to ensure they can reference their case treatment plans and progress to provide the best possible results. This is heavily linked to our research department at The Campbell Clinic to ensure that we are working to evidence-based protocols.

- 10-year guarantee (from date of implant placement/ crown fit date and hygiene treatment required)
- The Campbell Clinic expert level clinician treatment provided
- Specialist led and delivered service
- Straumann SLActive implant
- Premium lab and components used
- £3,794 Implant and crown (other charges may apply)

Level 2 Treatment:

Level 2 dental implant treatment at The Campbell Clinic is treatment carried out by clinicians at the practice within our multi-disciplinary team environment and under the supervision or direction of our senior clinicians. This attracts a 5-year guarantee for patients that undergo the recommended maintenance and uses all Straumann dental implants, components and high-quality laboratory supported provided restorations.

Our Level 2 option allows us to take the opportunity to utilise our clinicians that we have appointed and trained at The Campbell Clinic over many years to provide dental implant treatment.

This level of treatment utilises all Straumann and Geistlich dental implant and biomaterial products and the treatment is carried out by clinicians who have provided hundreds of dental implant cases.

We believe this is a wonderful and affordable option for dental implants, provided by an ethical and honest group of clinicians at a price that is comparable with other implant providers around the region.

- 5-year guarantee (from date of implant placement/ crown fit date, hygiene treatment required)
- Treatment from The Campbell Clinic implant clinicians
- Straumann SLActive implant
- £2,700 implant and crown (other charges may apply)

Level 3 Treatment:

Level 3 dental implant treatment at The Campbell Clinic is carried out at one of our dental implant courses provided by The Campbell Academy. This treatment will be carried out by course delegates under close supervision and is an extremely cost-effective treatment for patients. Please note, however, Level 3 is limited to straightforward and advanced cases.

This allows patients to have their dental implants placed by a qualified dentist who is attending one of our clinical courses and under supervision. Straumann and Geistlich materials and equipment are used at all times and this level attracts a 1-year guarantee for patients on the dental implant and dental implant crown for peace of mind.

- 1- year guarantee (from date of implant placement/ crown fit date, hygiene treatment required)
- Straumann SLActive implant
- £1,700 implant and crown (other charges may apply)
- The Campbell Academy course delegates responsible for placing the implant
- Specific dates are required for attendance
