

# TICK TABLE

OVERVIEW OF THE MOST COMMON TICKS FOUND IN THE U.S. THAT TRANSMIT PATHOGENS TO HUMANS. THIS IS ONLY A PARTIAL LIST. LEARN HOW TO [BE TICK AWARE AT GLA.ORG](https://www.gla.org)

TICK GENUS	COMMON NAME	ASSOCIATED ILLNESS	PATHOGEN
<p><i>Ixodes</i></p> 	<p>Blacklegged tick</p> <p>Deer tick</p> <p>Pacific tick</p>	<p>Lyme disease</p> <p>Relapsing fever</p> <p>Powassan encephalitis</p> <p>Babesiosis</p> <p>Human granulocytic anaplasmosis (HGA)</p> <p>Cat scratch fever</p> <p>Tick-borne encephalitis</p>	<p><i>Borrelia burgdoferi</i> &amp; <i>Borrelia mayonii</i></p> <p><i>Borrelia miyamotoi</i></p> <p>Powassan virus</p> <p><i>Babesia microti</i></p> <p><i>Anaplasma phagocytophila</i></p> <p><i>Bartonella henselae</i>*</p> <p>Tick-borne encephalitis virus</p>
<p><i>Amblyomma</i>**</p> 	<p>Lone Star tick</p>	<p>Human monocytic ehrlichiosis (HME)</p> <p>Southern tick-associated rash illness (STARI)</p> <p>Heartland virus disease</p> <p>Bourbon virus disease</p> <p>Tularemia</p>	<p><i>Ehrlichia spp.</i></p> <p>unknown</p> <p>Heartland virus</p> <p>Bourbon virus</p> <p><i>Francisella tularensis</i></p>
<p><i>Dermacentor</i></p> 	<p>Dog tick</p> <p>Rocky Mountain Wood tick</p>	<p>Spotted fever rickettsiosis***</p> <p>Tularemia</p>	<p><i>Rickettsia spp.</i></p> <p><i>Francisella tularensis</i></p>
<p><i>Ornithodoros</i></p> 	<p>Soft tick</p>	<p>Tick-borne relapsing fever</p>	<p><i>Borrelia hermsii</i> &amp; <i>Borrelia turicatae</i></p>
<p><i>Rhipicephalus</i></p> 	<p>Brown Dog tick</p>	<p>Spotted fever rickettsiosis***</p>	<p><i>Rickettsia spp.</i></p>
<p><i>Haemaphysalis</i></p> 	<p>Longhorned tick</p>	<p>Severe fever with thrombocytopenia syndrome (SFTS)****</p>	<p>Severe fever with thrombocytopenia syndrome virus (SFTSV)</p>

\*Bartonella is known to be spread by fleas; research is inconclusive regarding transmission by ticks. \*\*Bites of *Amblyomma americanum* are associated with mammalian meat allergy. \*\*\*Also known as Rocky Mountain Spotted Fever. \*\*\*\*SFTS has not been reported in the U.S. Haemaphysalis is a recent invasive tick.
