• KITCHENS MADE TO TASTE •

custom kitchens. built to taste.

Welcome to your Pepper kitchen. Like every good dish, your kitchen should reflect who you are. It should welcome you in and awaken your senses. Bold. Distinctive. Unexpected.

Pepper delivers that and more. We've designed a kitchen cabinet experience quite unlike any other. Much like you. With numerous options to help bring your vision and personality to life.

Flexibility is at the heart of every Pepper kitchen. Start with one of our designer-curated recipes and pepper in your own tastes. Or create something completely unique and amazing with our pantry of options.

Regardless of how you go about it, you can feel confident that you're making something guaranteed to impress. A kitchen that's uncommonly **customizable** and made with expert **craftsmanship**. A signature space that's designed to suit your **tastes** and lifestyle, and all at an exceptional **value**.

Read on to see what's shakin' in your Pepper kitchen.

kitchens. à la you.

UNCOMMONLY CUSTOMIZABLE

We all have our own tastes. Pepper offers all the options to create the kitchen you see when you close your eyes and dream. Perfection for your palette. Just as delightful to family and guests.

Whether you're a traditionalist or modernist or somewhere in between, Pepper has the right set of ingredients to make your dream kitchen come to life. We're constantly scouring the industry and keeping a close eye on designer blogs and shows to see what's hot and what's next. Pepper gives you literally hundreds of combinations of choices with numerous door styles, edge profiles, paint and stain colours, door hardware and other convenience & usability options.

- FULLY CUSTOMIZABLE LAYOUTS

EXPERT CRAFTSMANSHIP

Functionality. Feel. Finish. While tastes may vary, the need for quality and practicality is universal. When we say Pepper kitchens are crafted to an exceptional level, it's more than just words on a page.

Our construction process is the perfect combination of man and machine. We use state-of-the-art computer-aided machining to cut pieces with the utmost precision, while all components are hand-assembled by master craftspeople with immaculate attention to detail.

Our industry-leading 2K Polyurethane paints and stains offer superior scratch and moisture resistance. Applied using top-of-the-line robotics, then hand-sanded between coats by one of our experts, they offer a near flawless, high-end finish. Add to this Pepper's comprehensive inspection process, and kitchen construction has never looked so good.

Pepper standard features include:

1 Blind dado joinery in all cabinets and drawers for a sleeker finish. It's all in the details.

2 Fridge-top cabinets 26" deep to better line up with the front of the appliance. Cleaner look, easier access.

3 Fridge side panels for a seamless look. No more distasteful side-fridge.

4 2 banks of 3 drawers*, plus an extra drawer on top of each 12"+ cabinet. Way more drawers.

5 5/8" melamine on all drawer sides and bases, standard. No ugly metal sides. No flimsy drawer bottoms. Just darn solid drawers.

OFFERING EXCEPTIONAL VALUE

You get out what you put in. Pepper kitchens are chock full of options that most cabinet companies would charge extra for, and it shows. Some you will notice right away. Some will delight when you least expect it. All are part of what we have defined as our minimum standard of quality. A standard well beyond industry norms.

6 Pull-out trash bin* to conceal garbage and save floor space. We've pulled out all the stops.

7 Industry-leading 2K Polyurethane paints & stains. A simply superior surface finish.

8 Soft-close drawers and cabinet doors. Sshhh.

9 Full-extension drawer slides reveal the whole drawer tray. Maximum accessibility.

10 3 roll-out drawers for better access in all pantries*. That's how we roll.

*Where space permits.

show-stopping recipes.

DESIGNER-CURATED RECIPES THAT SUIT YOUR **STYLE**

While we love giving our customers the opportunity to customize their kitchen, we also know picking your kitchen finishes from hundreds of possible combinations can be a daunting task. So we asked our designer to clear the countertop and make it simpler for you to create a beautiful, designer-inspired kitchen.

After weeks of scrutiny and hard work, they curated four distinct cabinet lines, each with a narrowed down suite of door styles, colours, hardware and edge profiles that work beautifully together.

Pepper's four designer-curated lines are:

Heritage | Farm & Cottage | Urban | Euro

How does it work?

To get started, simply choose the line that best suits your taste and make your choices from the recommended finishes in that line. Of course, you can pepper in your own taste by choosing finishes outside of your chosen designer line to make it unmistakably you.

HERITAGE LINE

Classic. Traditional. Natural.

For traditionalists with a love of ornate design and craftsmanship, the Heritage line brings together classic style and natural finishes. Create that sense of comfort and belonging you feel when you walk into an older home – now combined with all the modern conveniences.

HERITAGE LINE

Classic. Traditional. Natural.

Notes from our experts

Classic and ornate, the Heritage line offers a present-day take on design traditions of yesteryear. Homey and inviting with warm colours and natural textures. This is where you'll find decorative tapware, ornamental moldings, and elegant glass cabinetry. Classic woodgrains and stains provide tasteful contrast with calming off-whites, creams and beiges.

FARM & COTTAGE

LINE

Homey. Comfortable. Inviting.

For those who appreciate a sense of comfort and casual good taste, the Farm & Cottage line combines an inviting feel with softer, earthy colours. From wooded sanctuary to lakeside blues and whites, the feel is less stark than our more modern lines, but maintains a touch of class.

FARM & COTTAGE

Homey. Comfortable. Inviting.

Notes from our experts

Kitchens that capture the casual, comfortable feel of home. From the informal country style of rural craftsmanship to the easy, breezy timelessness of a coastal cottage. These are serene places to reside. Softly spoken neutrals – off-whites, grays, beiges – meet with splashes of blue, from soft to Navy. A step to the decorative from our Euro and Urban lines, but not too ornate. Understated and hardworking.

Exterior C

A modern kitchen interior featuring a central island with a light-colored speckled countertop and a stainless steel sink. Three pendant lights with textured glass shades hang above the island. In the background, white cabinetry, a microwave, and a stove are visible. A bowl of oranges sits on the island counter. Four light-colored bar stools are positioned around the island.

URBAN LINE

Contemporary. Classic. Timeless.

For the modern-minded homeowner seeking a contemporary feel that won't age quickly. A design philosophy embodied by the shaker door – around forever, yet forever in style. Clean lines with a touch of decoration. Forward-thinking, inspired by design that transcends time.

URBAN LINE

Contemporary. Classic. Timeless.

Notes from our experts

The shaker door typifies urban style. A classic door that maintains its contemporary feel thanks to the simplicity of its design. Shake in a little you with a choice of subtle interior profiles. Go with a neutral or bright palette and highlight with bold accents. Soft whites and greys meet deeper grays and blacks. Simple, clean lines remain, but with them the opportunity to introduce more industrial qualities, hence blacks and bulkier metals.

EURO LINE

Modern. Clean. Minimalist.

For those seeking a kitchen that stands out by making as little noise as possible. Inspired by the latest European design trends, flat panels, clean lines and straight edges gently draw you in before aggressive textures hit you with striking impact. Welcome to the kitchen of tomorrow – no time travel required.

EURO LINE

Modern. Clean. Minimalist.

Notes from our experts

Clean lines, no fuss, pure simplicity. The Euro style mixes stark, silky smooth painted finishes with bold woodgrains for a striking-yet-sleek combination. Hardware follows the same rules as doors and finishes. Nothing too ornate. Square edges, clean aesthetic. Simple, functional, minimalist. Magnificent.
