Employment Resources – Project Milestones

-   Upon receipt of our engagement agreement and payment for our service, we will email you an Employment Resources Questionnaire for completion. Once you have returned the completed questionnaire, we will contact you to set up an initial intake call with your Consultant. During the intake call, your Consultant will go over the project stages and administrative matters with you and discuss your current organizational and employment structure, the division of roles/duties, compensation arrangements, as well as your vision for talent development and compensation incentives.
 -  To help you make informed decisions concerning your internal structure, SRG will provide industry-specific research, including reasonable pay scales based on your region, employee/professional roles, and method of payment (e.g., base salary, hourly pay, commission based, profit sharing, etc.).
 -  Based on your needs and preferences, SRG can build an interactive model to help you envision how the various payment methods you select for your employees affect their compensation and your business's overhead structure.
 -  SRG will provide comprehensive form contract(s) tailored to the financial services industry and your specific employment needs. These contracts should be reviewed by your attorney before executing.
 -  Upon completion of the project, you will receive an email from us with a link to our client satisfaction survey. We would appreciate your feedback!
