Smarter together

Sentral School Management underpinned by Microsoft technology

Some things just go better together. Sentral organises your school's administration, data, attendance, reports and more all in one simple management system – while Microsoft keeps everything secure, scalable, compliant and online. Together we provide an easy way to manage school information, with the reliability of a world-class platform. Here's why 3,000 Australian schools trust Sentral to manage their school and student data.

✓ Assured quality of Sentral and Microsoft technology – both of which hold the ISO 27001 information security standard

✓ A safe, secure, scalable platform that grows with your school

✓ A future-proof investment with continual updates and innovation from Microsoft and Sentral

> "Our decision to choose Sentral was driven by the one-stop-shop solution it offers our schools."
>
> **Doug Austing, District Principal (NSW), OneSchool Global**

Attendance Module

Easily integrate school timetables with an attendance tracker, which you can update daily from any device. It includes jurisdictional report templates, visitor evacuation lists, excursion management, and more.

Assessment & Reporting

Simplify your reports with a student management system that can track each student's curriculum progress, identify trends, and provide parents with ongoing updates.

Administration

Aggregates school administration data in one place saving valuable time by providing a one-stop shop for student profiles, health, assets, fees and billing, purchase orders, staff absences, parent interviews and school activities.

Wellbeing Tools

Define and manage student behaviour, staff messages, professional development, house points and more. This customisable system also incorporates educational outcomes, attendance, medical records, behaviours and social factors to support wellbeing management.
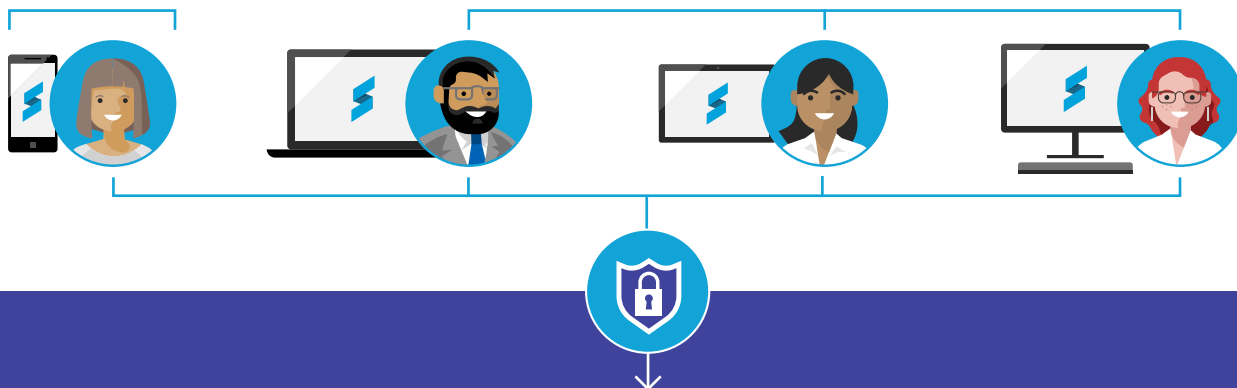

Parents App

Teachers and staff can quickly communicate with parents through instant messaging. Parents can make one-off payments, securely store payment instructions, set up direct debits, track homework and provide parental permissions, all in one place.

School Management Made Simple

Sentral's School Management System is built on the Microsoft platform, bringing you the best of all worlds. You'll have time-saving administration and management; student analytics to support teaching and wellbeing; secure protected data that meets compliance and smart collaboration to engage parents

Connect to **parents** via an App.

Secure sign on for every **teacher and staff member** to the Sentral software, files and tools they need on the device they prefer.

Sentral School Management System

Admissions + **Payments & Finance** + **Staff & Students** + **Community Engagement** + **Integration Partners**

One spot for school management
Streamline school administration, student management, enrolments, fees and billing with an integrated, efficient school management system.

Comprehensive finance solution tailored for schools
Generate fees, receipt payments and raise purchase orders with the flexibility to support each school's needs and automate manual processes.

Real-time analytics and graphs
Individualise learning, identify trends and intervene early with comprehensive analytics, graphs and heatmaps revealing student progress and behaviours.

Simple document sharing
Create, share ideas and make decisions with content management and collaboration tools that seamlessly integrate with other applications.

Powerful tools for teachers and students
Build collaborative classrooms, connect in professional learning communities, and co-create with colleagues

Microsoft Platform

Microsoft Dynamics charts financial performance in real time, and improves forecast accuracy while maintaining compliance and security.

Azure Active Directory provides secure identity management, enterprise single sign-on and multi-factor authentication.

Power Platform provides analytics and reporting services so you can create personalised student plans with continuum tracking tools for easy assessment.

Microsoft SharePoint gives staff instant access to each other, applications, and content so they spend less time searching for information and more time working with it.

Office 365 for Education, which is free for your entire school, includes Word, Excel, PowerPoint, OneNote, and Microsoft Teams.
