Admissions

An end to end solution that seamlessly transitions prospective students to a successful enrolment.

Sentral recognises that enrolling in a school is a significant journey for students and their families. The Sentral Admissions module takes a new perspective on enrolment and helps nurture this journey for all involved. Separate to Enrolments, Sentral Admissions allows administration staff to more effectively focus on their core tasks.

A streamlined documentation process simplifies the application procedure for parents and caregivers. Communication with the school is greatly enhanced through the effective recording of relevant information. This improves the management of enquiries and lead generation for prospective applicants.

Sentral Admissions enables simpler planning for future student numbers with an intuitive dashboard. This broad oversight and streamlined process also allows Sentral Admissions to become an integral part of your school's marketing operations. Admissions as a paid service can also be supported through use of the Sentral API and Parent Portal.

Key Benefits

Fully integrated into Sentral

Streamlined work methods

Oversight of enrolment status in real time

Improved handover between processes

Improved parent / caregiver experience

Realtime feedback from Enrolments

SENTRAL
A division of **global**payments

Supporting Key Staff

Sentral Admissions supports key staff with its streamlined documentation and improved workflow. The result is a superior first contact experience with parents and caregivers, with relevant information collected and initial concerns addressed.

With a decreased dependency on paper, all information is readily available. This enables managers to view enrolment status in real time and provide more efficient handover between staff at key points in the admission journey.

Admissions Dashboard

The dashboard provides quick oversight of expected, pending and remaining placements allowing administrators to more efficiently plan for future resources and staffing. Simple navigation allows overviews to be created for multiple campuses and academic periods.

Easily Add and Edit Admissions

A streamlined interface enables fast entry of relevant student data. Easily review information with the intuitive tab-based navigation.

Admissions Tracking

Use filters to easily sort and track incomplete and pending enrolments, as well as enrolments by priority status.

Report Generation

Easily create reports for current and future enrolments. View and export a comprehensive range of data including offers, confirmed enrolments, leaving students and forecast enrolments.

Admissions...a streamlined process of enrolment that leaves a positive lasting impression.
