

Enrolments

A comprehensive tool that manages student enrolment, household and staff data in a simple integrated environment.

The Sentral Enrolments module offers a simple and streamlined process for adding and managing student enrolments. Tasks such as creating enrolment inquiries, handling pending enrolments and managing waitlist applications become more efficient with less chance for errors in data entry.

The accurate management of household information is a critical aspect of enrolments. The Sentral Enrolments module enables administrators to correctly identify complex relationships within households and initiate communications accordingly.

Advanced reporting features enable administrators to create and export custom and ad hoc reports on student and family data, staff lists and state based curriculum records.

Key Benefits

Streamlined enrolment management

Reduced data entry errors

Accurate household information

Improved communication

Advanced report creation and export

Supporting key staff

Sentral Enrolments supports key staff with its streamlined documentation and improved workflow. The result is a more efficient experience for administrative staff with better communication between the school, parents and caregivers.

With a decreased dependency on paper, all information is readily available. An intuitive dashboard provides quick access to key information categories such as students, staff and households.

Enrolment predictions

Sentral Enrolments provides student and role class statistics which are displayed in simple chart and table format to provide predictions on future year group numbers. This information can greatly assist administrators for future planning and resource allocation.

Pending enrolments

Sentral enrolments enables administrators to handle a variety of complex enrolment scenarios easily. Inquiries, transitioning students, pending applications and students on waitlists are conveniently managed in the one location. Student enrolment information passes through a smooth process from a pending to accepted enrolment.

Detailed reporting

The export function provides the opportunity to create detailed reports based on a variety of filters and search criteria. Students and family data, timetable information and student/staff lists are easily created. Reports required for state-based education authorities are easily exported.

Advanced reporting features enable administrators to create and export custom and ad hoc reports on student and family data, staff lists and state based curriculum records.
