

Power BI

Presenting your school's data as stunning visuals that quickly convey important information.

Sentral comprehensively collects large amounts of data about your school. Making sense of data for effective decision making can be a difficult and daunting task. As a strategic partner with Microsoft, Sentral is pleased to offer Microsoft Power BI to help overcome that problem.

Power BI (Business Intelligence) is an analytical tool that brings raw data to life, creating visuals that are easy to interpret. Processes that previously involved the manual creation of charts and graphs are now replaced by instantaneous visuals that present your valuable data in engaging and insightful ways.

Gold

Microsoft Partner

Key Benefits

Instant data visualisation

Simple data analysis

Simultaneously analyse multiple data types

Aggregate data across different categories

Analyse cause and effect trends

Power BI – a gold standard solution

Test assumptions and analyse trends

Power BI enables analysis across various data categories, allowing you to test assumptions. Instead of using educated guesses, or manually created spreadsheets to draw conclusions, Power BI instantly presents your data as visuals that can be used for faster and more effective decision making.

Share knowledge and insight more easily with staff about trends across a range of academic and administrative issues. Power BI enables your staff to spend more time discussing the implications of the analysis, and less time interpreting complex data. This reduces administrative burden and frees up time for better teaching and learning.

Expand when you need to

Power BI is a global gold standard for analysing complex data. Sentral is pleased to offer the 'standard' visualisation tools with each Sentral service agreement. No special skills are required to benefit from this powerful analysis tool. For schools with appropriate software development resources wishing to extend their analysis, an extra editing licence can be purchased. This enables schools to conduct customised analysis to their specific requirements.

**Bring your school's
valuable data to life
and improve teaching
and learning with
Power BI.**
