

TITAN SERIES SLIDE GATE

www.vortexvalves.com

VALVE SIZE: 21" x 27" (533 mm x 686 mm)
30" x 39" (762 mm x 990 mm)

HANDLING: Cement Clinker

LOCATION: Cement Manufacturer
Central US

FEATURES: Per customer request, the twin and tri cylinder designs provide additional force - allowing the blade to close through a standing column of material if an upset condition occurs.

DETAILS: The gates replace existing air actuated gates where the actuators were underpowered. The Vortex gates matched the existing flange pattern design and were manufactured to address 300° F (150° C) temperatures.

700 lbs (317 kg)
1200 lbs (544 kg)
