

## TITAN SERIES SLIDE GATE

[www.vortexvalves.com](http://www.vortexvalves.com)

**VALVE SIZE:** 49" x 20" (1255 x 508 mm)

**HANDLING:** Gypsum Powder

**LOCATION:** Gypsum Processor  
Central US

**FEATURES:** This rectangular Titan Slide Gate was manufactured with a blade and inlet liners made of abrasive-resistant steel.

The twin cylinder design provides additional force, allowing the blade to close through a standing column of material if necessary.

**DETAILS:** The gate replaces a hammer gate installed beneath a bin bottom, above a screw conveyor. The hammer gate leaked material and was never able to be completely closed.

800 lbs (363 kg)
